FOREWORD

Now on its 21st edition, the Regional Social and Economic Trends (RSET) for the Cordillera Administrative Region (CAR) has proven to be very useful for planning and decision-making, and for setting policies towards effective governance and improved service delivery at the local level. The Philippine Statistics Authority (PSA), through its Regional Statistical Services Offices (RSSOs), continues to update and publish local level statistics designed to address the varied statistical needs of planners and policy makers at the subnational level.

The RSET, a compendium of local level statistics, presents annual time series data on various sectors of the region and its component provinces, cities, and municipalities. It also contains data that are disaggregated in different dimensions and includes a glossary of terms of official concepts and definitions for statistical purposes.

This edition of RSET includes a summary table of the List of Sustainable Development Goal (SDG) Indicators and Core Regional Indicators System (CORE-IS) available in this publication. The 2030 Agenda for Sustainable Development and its 17 Sustainable Development Goals (SDGs) adopted by world leaders in 2015 embody a roadmap for progress that is sustainable and leaves no one behind, and the CORE-IS consists of priority indicators that generate statistics vital towards achieving the local development goals.

We acknowledge the valuable contributions of our various data sources without which the publication of the RSET would not have been made possible. We likewise appreciate the support of our clients who continue to patronize and recognize this publication as an important tool for evidence-based decision making.

We reiterate our call on our partner agencies to continue our collaboration towards the empowerment of the countryside by making statistics more available and accessible to users. To continue improving our statistical products and services, we enjoin both our data sources and users to share their comments and suggestions to guide us in improving future editions of the RSET and other publications of the PSA.

DENNIS S. MAPA, Ph. D.

CHAPTER 1 POPULATION AND HOUSING	9
LIST OF TABLES	
Table 1.1 Population and Growth Rate by Province/City/Municipality, CAR Census Years 1980-2015	10
Table 1.2 Total Population, Land Area and Density by Province/City/ Municipality, CAR Census Years 1980-2015	14
Table 1.3A Household Population by Sex and Age Group, CAR Census Years 1990,1995, 2000, 2007, 2010 and 2015	18
Table 1.3B Household Population by Sex, Age Group and Province, CAR Census Years 1990,1995, 2000, 2007, 2010 and 2015	19
Table 1.4A Household Population 10 Years Old and Over by Sex, Age Group and Marital Status, CAR: Census Years 1990,1995, 2000, 2010 and 2015	26
Table 1.4B Household Population 10 Years Old and Over by Sex, Age Group, Marital Status and Province, CAR: Census Years 2000, 2010 and 2015	31
Table 1.4C Household Population 10 Years Old and Over by Sex, Age Group, Marital Status and City, CAR: Census Years 1990, 1995, 2000, 2010 and 2015	49
Table 1.5 Age Dependency Ratio by Province/City, CAR: Census Years 1970 - 2015	54
Table 1.6 Sex Ratio by Province/City, CAR: Census Years 1980-2015	55
Table 1.7 Number of Migrants by Sex and Province, CAR: 1985-1990	55
Table 1.8A Language/Dialect Generally Spoken by Private Households by Province/City, CAR: Census Year 1995	56
Table 1.8B Language/Dialect Generally Spoken by Private Households by Province/City, CAR: Census Year 2000	58

Table 1.9A	Household Population Five Years and Over by Sex and Place of Residence 5 Years Ago by Province/City, CAR: Census Year 2000	62
Table 1.9B	Household Population Five Years and Over by Sex and Place of Residence 5 Years Ago by Province/City, CAR: Census Year 2010	63
Table 1.10	Projected Net Migration Rate by Sex and by Region, CAR: 2010-2045	64
Table 1.11	Number of In-Migrants by Sex and Area of Origin by Province, CAR 1985-1990	65
Table 1.12	Number of Out-Migrants by Sex and Area of Destination by Province, CAR 1985-1990	69
Table 1.13A	Projected Population of CAR by Sex (Medium Assumption), CAR: 2010-2020	73.
Table 1.13B	Population Projections of CAR by Five-Year Interval by Province, (Medium Assumption), CAR: 2010-2035	74
Table 1.14	Number of Households and Average Household Size by Province/City/Municipality, CAR: Census Years 2000, 2010 and 2015	75
Table 1.15	Number of Occupied and Vacant Housing Units by Province/City/Municipality, CAR: Census Years 1980, 1990, 2000 and 2010	78
Table 1.16A	Occupied Housing Units, Number of Households and Household Population by Type of Building and Province, CAR: Census Year 2000	80
Table 1.16B	Occupied Housing Units, Number of Households and Household Population by Type of Building and Province, CAR: Census Year 2010	82
Table 1.16C	Occupied Housing Units, Number of Households and Household Population by Type of Building and Province, CAR: Census Year 2015	84
Table 1.17A	Number of Households in Occupied Housing Units by Type of Occupancy, Building Type and Province/City, CAR: Census Year 2000	86
Table 1.17B	Number of Households in Occupied Housing Units by Type of Occupancy, Building Type and Province/City, CAR: Census Year 2010	88
Table 1.18A	Number of Occupied Dwelling Units by Construction Materials of Roofs and Outer Walls Materials by Province/City, CAR: Census Year 2000	92
Table 1.18B	Number of Occupied Dwelling Units by Construction Materials of Roofs and Outer Walls Materials by Province/City, CAR: Census Year 2010	94
Table 1.18C	Number of Occupied Dwelling Units by Construction Materials of Roofs and Outer Walls Materials by Province/City, CAR: Census Year 2015	96
Table 1.19A	Number of Households in Occupied Dwelling Units by Main Source of Water Supply for Drinking by Province/City, CAR: Census Years 2010 and 2015	98
Table 1.19B	Number of Households in Occupied Dwelling Units by Main Source of Water Supply for Cooking by Province/City, CAR: Census Years 2010 and 2015	101
Table 1.20	Number of Households in Occupied Dwelling Units by Kind of Lighting Used by Province, CAR: Census Years 1990, 2000, 2010 and 2015	104

Table 1.21	Number of Households in Occupied Dwelling Units by Kind of Cooking Fuel Used by Province, CAR: Census Years 1980, 1990, 2000 and 2010	105
Table 1.22	Number of Households in Occupied Dwelling Units with Household Appliances/Conveniences by Province, CAR: Census Year 2010	106
Table 1.23	Number of Households in Occupied Dwelling Units by Type of Toilet Facility Being Used by Province, CAR: Census Years 1980, 1990, 2000 and 2010	107
Table 1.24	Number of Households by Usual Manner of Garbage Disposal by Province/City/Municipality, CAR: Census Year 2010	109
Table 1.25	Human Development Index by Province, CAR: 1997, 2000, 2003, 2006, 2009 and 2012	112
Table 1.26	Household Population by Ethnicity Groups by Province/City, CAR Census Year 2010	114

LIST OF FIGURES

Products and Services

Products

1. Statistical policies and measures to resolve specific issues and provide policy directions in the Philippine Statistical System (PSS)
2. The Philippine Statistical Development Program (PSDP) to serve as blueprint of priority programs and activities to be undertaken to improve the PSS in the Medium Term
3. National Accounts and related economic accounts to assess the economic performance of the country thru the following:
 - National Accounts
 - Regional Accounts
 - Input-Output (I-O) Accounts
 - National Health Accounts
 - National Education Accounts
4. Other social and economic indicators
 - Poverty statistics
 - Environment statistics
 - Food balance sheet
 - Indicators on children and women
 - Gender and development statistics
 - Quarterly economic indices
 - Foreign direct investments
 - Leading economic indicators
 - Economic and social impact analysis indicators
 - Human development index
5. Standards and classification systems to prescribe uniform standards in government statistics
 - Philippine Standard Occupational Classification (PSOC)
 - Philippine Standard Commodity Classification (PSCC)
 - Philippine Standard Industrial Classification (PSIC)
 - Philippine Standard Geographic Code (PSGC)
 - Philippine Standard Classification of Education (PSCED)
 - Philippine Classification of Commodities by Broad Economic Categories (PCCBEC)
 - Philippine Central Product Classification (PCPC)
6. Statistical publications to disseminate the most relevant information produced by the PSS and to make statistics more accessible to the public

Services

1. Maintenance of a one-stop statistical information center
2. Monitoring of designated statistics
3. Coordination of subnational statistical system
4. Coordination of inter-agency concerns on statistics
5. Survey review and clearance
6. On-line statistical service through the internet (psa.gov.ph, psacordillera.esy.es)
7. Servicing data requests
8. Technical services
9. Advocacy for statistical awareness
 - National Statistics Month
 - National Convention on Statistics
 - Government Statistics Accessibility Program
 - Hosting of international conferences in statistics

OVERVIEW

The Cordillera Administrative Region (CAR) is the landlocked, mountainous region of Northern Luzon. It consists of the provinces of Abra, Apayao, Benguet, Ifugao, Kalinga, Mt. Province, with Baguio City as administrative, service and trade center. The region's total land area is 18,293.7 sq. km., or about 6.1 percent of the country's total land area. CAR consists of six provinces, one chartered city, one component city, 75 municipalities and 1,176 barangays as of 31 March 2013. The population of CAR as of August 1, 2015 was 1,722,006 or about 1.7 percent of the country's total. CAR's population grew at the average annual rate of 1.53 percent during the period 2010-2015.

The region is the gateway to the natural wonders of Northern Luzon. These include the famous Banaue Rice Terraces in Ifugao, which is considered the "Eighth Wonder of the World" and is included in the UNESCO World Heritage List. Other natural attractions of the region are the splendid Sumaguing Cave in Sagada and the mummy caves of Benguet and Mt. Province. Meanwhile, the province of Kalinga is emerging as the "Ecotourism Discovery of the Cordilleras." The distinct culture and colorful traditions of the indigenous peoples of the Cordillera likewise make the region unique.

CAR is the "Watershed Cradle of Northern Luzon," and features 13 major watersheds or river basins that supply water not only to the region but to the adjacent lowland areas in Regions I, II, and III as well. This critical water resource has the potential of meeting the demand for energy and irrigation of CAR and the rest of Northern Luzon. These watersheds also feature other vital natural resources such as forest, biodiversity, and minerals.

SUMMARY OF MAJOR STATISTICAL SERIES

SUMMARY OF MAJOR STATISTICAL SERIES

Statistical Series	Latest Data		Compared to		Percent Change
	Reference Period	Value	Reference Period	Value	

Chapter 1. POPULATION AND HOUSING STATISTICS

1. Population	Aug. 1, 2015	1,722,006	May 1, 2010	1,616,867	6.5
2. Sex Distribution	Aug. 1, 2015		May 1, 2010		
Both Sexes		1,714,220		1,611,669	6.4
Men (percent)		51		51	-
Women (percent)		49		49	-
3. Provincial/City Distribution	Aug. 1, 2015	1,722,006	May 1, 2010	1,616,867	6.5
Abra		241,160		234,733	2.7

Chapter 1

POPULATION & HOUSING

Data on size, distribution and demographic characteristics of the population and the stock and condition of housing units are essential in the planning and decision making process of governmental instrumentalities and private business alike. The data provide the bases in determining what, where, how, and when public services and facilities and interventions should be put in place. The impact of services, programs, and projects implemented are measured vis-à-vis the effects on the socioeconomic well-being of the populace, as the ultimate beneficiaries of governance and development. Entrepreneurs and corporate executives and managers in the private sector use the data in making decisions on the level, form, programming, and distribution of resources that will be invested. The return of their investments is largely determined by their response to the market created by the demand of the consumers and readiness to supply goods and services that satisfy the needs and capabilities of the public.

This chapter presents data series pertaining to the region and by province/city/municipality, where available. The data series include the population count during several censuses conducted nationwide as well as the demographic characteristics, migration patterns and housing units. Projections of the population in the region from 2010 to 2045, which are estimated based on the results of the population census and demographic surveys, are also presented. The data sources are the Philippine Statistics Authority for census data and the collaborative effort of the Inter-Agency Working Group on Population Projections for the 2010 Census-Based population projections.

HIGHLIGHTS

- The total population of the Cordillera Administrative Region (CAR) as of August 1, 2015 was 1,722,006, an additional of 105,139 from the 2010 census count.
- The annual population growth rate from 2010-2015 was 1.2 percent, slower than the previous growth of 2.3 percent between 2007 and 2010.
- One in every five of the region's population resided in Baguio City, the administrative, service and trade center of CAR.
- Baguio City had the highest population density with 6,005 persons per square kilometer or 68 times that of the region.
- Among the six provinces of CAR, Benguet (excluding Baguio) had the largest population in 2015 with 446,224 while the province of Apayao registered the least population with 119,184.

Notes: 1. Net internal migration rate is the ratio of the difference between the in-migrants and out-migrants in a population to the mid-year population during the same period.
2. Figures are based on the 2010 Census of Population.
3. Figures inside parentheses indicate outmigration.

Chapter 2 INCOME & PRICES

Data on the levels and patterns of family income and expenditure, poverty incidence and threshold, and price indices are vital indicators of the socioeconomic status of the people. Specifically, these data provide a picture of the standard of living, the varying degrees of inequality, the purchasing capacity, and the demands for goods and services of the families. The data are essential in the conceptualization and assessment of poverty alleviation programs of government, private, and non-government organizations. The data have become more significant to all sectors now that genuine efforts are being demonstrated in pursuing the social reform agenda. The trends, patterns, and signals shown by the data have been given wide and serious attention due to the far reaching ramifications on policies and programs aimed at people empowerment. The use of the data had accordingly permeated all echelons of the government bureaucracy, private businesses, and even the ordinary citizens themselves. With the support provided by the data, interventions can be implemented to help the citizenry respond to situations brought about by increased prices, incidence of poverty, and low-income capacity, among others.

This chapter presents family income, expenditures and savings, and consumer price indices data of the region and its respective provinces. Several indicators derived from these basic data such as poverty incidence and threshold, inflation rate, and purchasing power of the peso are also shown in this chapter. The income, expenditures, and price data are generated from the results of the Family Income and Expenditures Survey (FIES) and price surveys of the Philippine Statistics Authority (PSA). The poverty statistics are computed using the results of the FIES by the Technical Committee on Poverty Statistics (TC PovStat).

HIGHLIGHTS

- Almost 9 out of 100 families were estimated to be poor in 2018. This figure is significantly lower than in 2015 which was estimated at almost 15 poor out of 100 families.
- About 3 in 100 Cordillerans lived in extreme poverty in 2018.
- In 2015, the three basic sectors in the Cordilleras which posted the highest poverty incidence were as follows: Children and Farmer (28.1%) and self-employed (25.2%).
- Based on the small area estimates of poverty, the least poor residents in CAR have consistently been found in Baguio City and La Trinidad in 2009, 2012 and 2015.
- The Consumer Price Index (2012=100) in CAR for all items rose by 2.1 percent in 2019.
- One peso in 2012 was worth only 83 centavos in December 2019.

Chapter 3

ECONOMIC ACCOUNTS

The economic accounts of the region, which are presented in terms of the Gross Regional Domestic Product (GRDP), provides a comprehensive and meaningful quantitative picture of the regional economy. Specifically, the GRDP shows the levels and growth of the region's economic performance; the structure of the regional economy by industrial origin; and the sectors that contributed to the region's growth. The accounts likewise serve as a yardstick for assessing the economic performance of the region during a given period and over a span of time. With its usefulness in charting the socio-economic growth path of the region, the GRDP, a macroeconomic indicator of economic performance, is necessary in planning, policy formulation and analysis.

This chapter presents the GRDP on an annual basis in terms of levels, growth, and indices at constant and current prices. The series is generated by the Philippine Statistics Authority from primary and secondary data sources gathered from the various data producers in the country.

HIGHLIGHTS

- The Gross Regional Domestic Product (GRDP) of CAR decelerated from 12.2 percent in 2017 to 7.3 percent in 2018.
- CAR's AHFF reversed from 5.1 percent in 2017 to (5.3) percent in 2018.
- Industry decelerated from 18.8 percent to 9.2 percent.
- Services accelerated from 6.1 percent in 2017 to 7.5 percent in 2018.

Chapter 4

ENVIRONMENT & NATURAL RESOURCES

Data on the region's natural resources and some indicators of its environmental condition are necessary in the formulation of policies and programs designed to bring about a more effective environmental protection and resource utilization. A growing awareness and national concern for the country's natural resources and environmental condition has been demonstrated during the past years. This resulted from the development vision long espoused by national and local leaders and the worldwide goal towards sustainable development. The said goal, now a global advocacy, implies a balance between resource utilization and the development, protection, and conservation of the country's environment and natural resources. In this fashion, development will benefit not only today's generation but the future ones as well. All these concerns underscore the need for more reliable, timely, and comprehensive data. The data are critical to the government, private sector and even the international community in their formulation of measures to safeguard the environment and natural resources and to remedy destruction and degradation of these areas.

This chapter presents data on existing and available land, forest, mineral resources, and watershed areas of the region and its provinces. Also included in this chapter are statistics on forest destruction and area reforested in the region. Meanwhile, the environmental statistics presented pertain to results of resource extraction and climatological occurrences. The data sources include the Department of Environment and Natural Resources, Mines and Geosciences Bureau, and the Philippine Atmospheric, Geophysical and Astronomical Services Administration.

HIGHLIGHTS

- As of 2017, the total land area of CAR was estimated at 1,865,660 hectares. Of this area, 15.1 percent were Certified Alienable and Disposable Lands while 84.9 percent were Forestlands.
- As of January 1, 2018, there were 46 major proclaimed forest and watershed reservations in CAR covering an area of about 1,540,914 hectares or 82.6 percent of the total land area of the Cordilleras.
- Log production in CAR decreased by 19.2 percent or from 1,484 cubic meters in 2018 to 1,199 cubic meters in 2019.

Chapter 5

AGRICULTURE & AGRARIAN REFORM

Data on agriculture and agrarian reform are vital in guiding our concerned decision-makers, administrators, and lawmakers. This is anchored on the situation where agriculture still plays a major role in the growth and stability of the region's economy. More than half the population is dependent on agriculture for livelihood. Furthermore, the sector is a major source of food needed for the survival of the population. These factors then mandate the key players in government to give priority to agriculture development. This also means focusing on the agrarian reform program in order to promote social justice, sound rural development and industrialization. Specifically, the data provided objective bases for redirecting the focus of legislation and plans for the development of the agriculture and fishery sectors and the implementation of the agrarian reform agenda. The data also provide indicators of the successes and impacts of strategies/programs/projects in the lives of farmers and fisher-folks in the countryside. The status and trends portrayed by the data are used in redefining the beneficiaries of interventions in these sectors. In this manner, the systems of monitoring and assessment of programs/projects can be better sharpened and refocused to give greater attention to problems and potential areas.

This chapter presents regional and provincial data on crops, livestock, poultry, fishery, number and area of farms by size, status of the Comprehensive Agrarian Reform Program (CARP), and number of registered and re-registered cooperatives. The statistics on crop, livestock, poultry, and fishery are sourced from the Philippine Statistics Authority (PSA) which generated the data from the results of the various surveys regularly conducted by the office. Another data from the PSA is the number and size of farms using the results of the Census of Agriculture and Fisheries undertaken nationwide in 1991, 2002, and 2012. The data on the implementation of the CARP were gathered from the Department of Agrarian Reform based on the administrative reports prescribed by the Department while the data on cooperatives were taken from the Cooperative Development Authority.

HIGHLIGHTS

- Palay production increased by 7.0 percent from 391,105 metric tons in 2018 to 418,321 in 2019.
- Corn production increased by 12.0 percent from 207,439 metric tons in 2018 to 232,351 metric tons in 2019.

Chapter 6

ESTABLISHMENT CHARACTERISTICS: INDUSTRY

Data on the industries and investments in the region serve as gauge of the extent of the area's attractiveness to and capability to absorb entrepreneurial ventures. An analysis of the data on the size and growth of industries and the stock and flow of investment shows the enabling factors that provide or enhance the comparative advantages enjoyed by industries and investors in the area. On the other hand, the data can give indications of the limiting factors that hinder the entry, growth, and movement of industries and investments. With the data providing signals, the concerned governmental instrumentalities can formulate policies, enforce regulations and undertake infrastructure programs, and other forms of assistance to assist business and prospective investors. Armed with the data, key decision-makers in the government and private sectors can also forge alliances to improve the business climate and environment. Ultimately, the policies and measures implemented as well as the alliances can serve as instruments for achieving growth and providing employment opportunities, among others, to the region's labor force.

This chapter presents regional and provincial data, where available, on the number of establishments by major industry division, the number, floor area and value of private building construction, and the value of investments and employment. The data sources are the Philippine Statistics Authority for the establishments and building construction data and the Department of Trade and Industry for the investments statistics.

HIGHLIGHTS

- The total number of building construction in CAR increased by 20.9 percent from 1,230 in 2018 to 1,487 in 2019. Also, the total floor area of building construction increased by 22.4 percent from 519,933 square meters in 2018 to 636,298 square meters in 2019.
- DTI-monitored investments slight increase by 0.51 percent from 1.75 billion pesos in 2018 to 1.76 billion pesos in 2019.

Notes:

1. The 2018 List of Establishments (LE) was based on the complete enumeration of establishments in identified priority areas (barangays), field verification of "no matched" establishments from secondary sources and updates from feedbacks on the surveys undertaken by the office.
2. The 2018 LE used the 2009 Philippine Standard Industrial Classification

Data on trade reflect the extent of the inward and outward flow of commodities in the area. Proprietors and the managers and executives of private businesses can use the data in identifying markets with high potentials and in making decisions on which commodities to produce and what market to penetrate. Leaders and implementers in the government, on the other hand, can conceptualize and initiate programs, projects, services, and facilities designed to further stimulate trading activities in high yielding areas and/or in those sectors where a demand and supply gap exists. The data are also useful in identifying areas and products that can be improved/promoted for global competitiveness.

This chapter presents the data on the volume and value of commodities that enter CAR either for exports or imports and the value of commodity flow in the region. The Philippine Statistics Authority is the source of the data on commodity flow which are processed from administrative reporting forms prescribed by agencies in government involved in the collection of customs and tariff charges. Export and import data are also provided by the PSA.

HIGHLIGHTS

- The value of exports in CAR decreased by 10.96 percent from 791 million dollars in 2018 to 704 million dollars in 2019.
- During the same period, the value of imports decreased by 13.53 percent.

Data on tourism provide a panorama of the region as a tourist destination. The significance of the picture presented by the data manifests the importance accorded to the tourism industry by both national and local leaders. Specifically, tourism has become a twin source of foreign exchange receipts and livelihood and employment opportunities for communities. Data on the industry are therefore essential in providing vital links in the development and orchestration of campaigns aimed at promoting the potential of the region as a tourist hideaway. Local leaders can help put up infrastructure programs and centers and facilities and institute policies and regulations that will boost the inflow of visitors. Investors, on the other hand, can take the signal by developing tourist and recreational sites and putting up establishments and amenities. In concrete terms, the data likewise provide a quantitative measure of the results of programs that promote the area as a traveler's destination, and the industry's contribution to the economic performance of the area.

This chapter presents regional and/or provincial data on the following: visitor arrivals and their countries of origin, the number of hotels and hotel rooms, and the average occupancy rates of accommodation facilities. The data source is the Department of Tourism.

HIGHLIGHTS

- Visitor arrivals in the Cordilleras declined by 7.8 percent from 2,185,877 in 2018 to 2,015,400 in 2019.
- Domestic travelers comprised 95.8 percent of visitors in 2019.
- Among foreign tourists in 2019, the visitors from France comprised the biggest number with a share of 15.8 percent. The visitors from the US came next with a share of 12.0, South Korean with a share of 11.9 percent, and Israel at 5.6 percent.

Chapter 9

HEALTH, NUTRITION & VITAL STATISTICS

Data on vital events, health and nutrition are key inputs to programs aimed at providing the basic minimum services to the citizenry. The data provide a profile of the health status and the level, causes and patterns of the mortality and morbidity of the population. The health and nutrition status of the people are an utmost concern of local governance. The focus of current development efforts is towards extending better services and expanding the delivery systems even to the remotest rural communities. This is anchored on the concept that no individual should be deprived of the right to health care. Furthermore, the strength and well-being of the people influence their capabilities to engage in various economic endeavors. A cross-analysis of the data with the demographic and socioeconomic information of the target population shows the existing and potential problems in an area. The health and nutrition status of the population should therefore be a priority in public service and be resolved immediately so as to truly empower the people, an objective of growth and development. These concerns and objectives necessitate the provision of data as bases in the delivery of services catering to the health and nutritional requirements of individuals.

This chapter presents statistics for the region and its provinces/city on the registration of vital events occurring in these areas. The data include the number of births, deaths and marriages, including infant, fetal and maternal deaths, and the leading causes of mortality. This chapter likewise contains data on fertility, projected life expectancies, and the number of health personnel and facilities. Meanwhile, the data on health and nutrition presented include the nutritional status of children, the leading causes of morbidity, and notifiable diseases. The sources of data are the Philippine Statistics Authority - National Statistics Office for vital statistics (processed using the certificates of births, deaths, and marriages), fertility rates, and the data on mortality by sex and age group. Data on average life expectancies were estimated based on the results of vital and demographic events and were generated by the Technical Working Group on Population Projections of the National Statistical Coordination Board while those based on the census of population were sourced from the PSA. The data on causes of mortality and morbidity, notifiable diseases, and health personnel and facilities were sourced from the Department of Health. This chapter also presents Sustainable Development Goals (SDG) indicators. Look for the tables with the SDG icon:

HIGHLIGHTS

- For the period 2015 - 2020, the projected life expectancy of women in CAR is 75 years compared to 69 years for men.

Notes:

1) Mortality rates from 1990-1992 and 1994-2000 were revised.

2) Population figures for 2001-2003 were taken from the 1995 Census-Based City/Municipal Population Projections.

Data on the country's educational system are essential in the planning, implementation, and supervision of programs in this field. The primary goal of the programs is to develop a meaningful and efficient educational system in the country. This is a priority thrust of the government today. A specific objective of programs and systems put in place is to update the quality of our educational system at all levels. Education is indispensable in bringing about the desired behavioral and attitudinal changes in the population to affect socioeconomic development. The far-reaching and enduring effects of a literate citizenry on individual and societal growth and progress call for serious efforts to continuously improve and promote the accessibility of our educational system to changes in the socioeconomic sphere and the demands of development initiatives pose a challenge to our decision-makers and educators. To address these challenges in the most efficient and effective manner, an adequate and timely supply of data focusing on the levels and state of resources and facilities and the accomplishments of our educational system is indeed vital.

This chapter presents data on important aspects of the educational system at the regional down to the division level. The statistics presented include enrollment, number of schools, and teachers by level of education, government or private, and tertiary graduates by program. The chapter contains performance indicators, such as participation, retention, survival, completion, drop-out, and transition rates. This chapter also shows data on literacy rate and highest grade completed of the population and the school-going age population. The basic sources of data are the Department of Education (DepEd), the Commission on Higher Education (CHED), and the Philippine Statistics Authority - National Statistics Office. The DepEd and CHED compiles, tabulates, analyzes, and releases data pertaining to the educational system by level and the derived performance indicators based on the administrative reporting systems of these agencies. The PSA, on the other hand, generates data on literacy, school-going age population, and educational attainment of households using the results of its census of population and the Functional Literacy, Education and Mass Media Survey (FLEMMS). Table 10.6 entitled *Performance Indicators in Government Elementary and Secondary Schools* contains an indicator of the Sustainable Development Goals (SDG). Look for the MDG icon:

HIGHLIGHTS

- Enrollment in public high school increased from 147,300 enrollees of SY 2018-2019 to 129,872 enrollees in SY 2019-2020.
- Enrollment in higher education institutions (HEIs) in the region increased by 6.4 percent in SY 2018-2019 compared to the previous academic year.

Notes:

(1) Technical Vocational Institution (TVI) is a school or training center that offers technical vocational course or Qualification in accordance with Training Regulations whose courses/qualifications are registered under the TESDA Unified TVET Program Registration and Accreditation System.

(2) Qualification refers to the group of competencies that describes the different functions of the qualification; popularly known a tech-voc course or program.

(3) Benguet data for 2003 to 2007, 2009 to 2012 include Baguio City.

Chapter 11

LABOR & EMPLOYMENT

Data on labor and employment are critical inputs in the formulation of policies aimed at providing adequate employment opportunities and productive activities to the country's labor force. The labor force is the backbone of the economy. This single factor alone, speaks of a vital sector that plays a crucial role in the development of the nation and the uplift the economic well-being of the people. Data on the situation obtaining in the workplace are also necessary in enhancing the policies and programs of government towards promoting harmonious labor relations and productivity. The generation of adequate, timely, and reliable data is an imperative need of the formulators and implementers of our laws, policies and decisions.

This chapter presents data on the number and employment status of labor force at the regional and provincial levels. On employed persons, the data presented includes the mean hours worked, the major industry and occupation group, and class of worker. On unemployed persons, on the other hand, the data contained in this chapter includes the highest grade completed. The chapter also presents data on labor relations and unions/labor organizations and collective bargaining agreement, and labor cases handled. The basic sources of data are the Philippine Statistics Authority (PSA) and the National Labor Relations Commission (NLRC). The PSA generates the data on the labor force and its employment status using the results of its quarterly Labor Force Survey. Meanwhile, NLRC are the sources of data on labor relations and welfare using the various publications released regularly by the bureau and reporting system of the commission. This chapter also presents Sustainable Development Goals (SDG) indicators. Look for the tables with the SDG icon:

HIGHLIGHTS

- Of the 818 thousand persons in the labor force in 2019, 795 thousand or 97.2 percent were employed.
- About 39.9 percent of employed persons in CAR were engaged in the Agriculture, Fishing and Forestry Industry group in October 2019.

Data on social welfare serve as indicators of the results and impacts of goals, policies and programs on human development. This universal concern emphasizes people's empowerment and the care, protection, and rehabilitation of the disadvantaged and special sectors of the society. These sectors are the primary target clienteles of our social welfare policies and programs. The objective is to place the disadvantaged sectors of the society in the mainstream of productive and economic processes. Specifically, this entails converting the disadvantaged groups into active agents and partners in development. In this manner, the fruits of growth and progress will pervade all sectors of society and disadvantaged sectors will become beneficiaries of development. The government's Social Reform Agenda (SRA) redirects the thrust and focus and widens the target beneficiaries of the package of programs and other interventions implemented by government, private and non-governmental institutions. In contribution to the goals of social welfare and development, the generation of data and relevant indicators is therefore of utmost necessity. The SRA, for one, underscores the need to strengthen and improve existing systems for generating data.

This chapter presents data at the regional and/or provincial/city levels on the number of clients served by the various outreach and service programs of the Department of Social Welfare and Development (DSWD). DSWD compiles the information based on its administrative reporting systems. The chapter also contains data on the number of disabled persons by type of disability. The National Statistics Office processed the data based on the results of the census of population and housing. Also presented in the chapter are data on the programs and projects in indigenous cultural communities implemented by the National Commission for Indigenous Peoples (NCIP). This chapter also presents Sustainable Development Goals (SDG) indicators. Look for the tables with the SDG icon:

HIGHLIGHTS

- In 2019, there were 145,074 beneficiary families of the Pantawid Pamilyang Pilipino Program (4Ps) of the DSWD.

Chapter 13

TRANSPORTATION & COMMUNICATION

Data on the extent and coverage of the transportation and communication networks of an area are essential. The data provide planners and decision-makers in government and entrepreneurial ventures with a sound basis to improve the state of their infrastructures. Specifically, planners use the data in the formulation of strategies that will link the locality with its neighbors within and outside the country. The different modes of transportation and channels and media communication are vital in the economic, social, and cultural lives of peoples and institutions in the community. A well-developed transportation system ensures fast and efficient transfer of goods and services between traders, households and other institutions within and outside the geographical limits of the community. Similarly, breakthroughs in the communication system accelerates the flow of information. This era of information technology enables a faster access to and the dissemination of news, events, and developments in the domestic and international scene. Under this situation, the citizenry becomes well-informed of events and developments affecting their lives. The business community, on the other hand, receives vital information that can expand the market for their products and services. The continuous provision of data on the transportation and communication systems of an area therefore becomes indispensable in charting the course towards socioeconomic development and cultural upliftment of the area.

This chapter presents data on all modes of transportation at the regional and/or provincial/city levels. On land transport, the data presented include the registration of motor vehicles and permits/licenses issued by the Land Transportation Office. The data presented also include road lengths sourced from the Department of Public Works and Highways. On air transport, this chapter shows data covering the movements of aircrafts and the volume of passengers and cargo handled from the Air Transportation Office. The chapter also provides data on the number of telecommunication facilities, licensed radio stations, telegraph stations, telephone distribution, and post offices and mail carriers and the volume of mail. The sources of data are the National Telecommunications Commission and the Philippine Postal Corporation. This chapter also presents one Sustainable Development Goal (SDG) indicator as shown in Table 13.11 with the SDG icon

HIGHLIGHTS

- The total number of registered motor vehicles in CAR increased by 21.0 percent in 2019 from 152,285 in 2018 to 184,319 in 2019.
- A total of 4,936 application for radio licensing were received in 2018, composed of 13.6 percent of new application and 86.4 percent of application for renewal.

Chapter 14

ENERGY & WATER RESOURCES

Data on energy and water resources are vital inputs to national and local programs of government. The business/industry sector also uses the data in the preparation of feasibility studies and in investment planning. The importance of these resources in countryside development is recognized in many ways. Energy and water are essential resources in stimulating the growth of businesses and other institutions operating in the locality. Industries, the major contributors to the region's economy, are highly dependent on these resources. The resources are also vital in the day-to-day lives of individuals residing in the community. Considering the multifarious uses of these resources, the data on the level, extent, sources, and utilization of energy and water provide signals on the potentials of the area to achieve growth and development. The data also serve as indicators of the standard of living of families comprising the community.

This chapter presents regional and provincial data on power and irrigation. Specifically, the data on power include the number of municipalities/barangays energized, power distributed, and service connections by electric cooperatives. Meanwhile, the data on irrigation include service/generated area of irrigation systems. The sources of energy and irrigation data are the National Electrification Administration and the National Irrigation Administration, respectively.

HIGHLIGHTS

- As of 2015, all barangays covered by the different electric cooperatives in the Cordillera Administrative Region were 100 percent.
- The area of irrigated land during the wet season in CAR increased by 6.0 percent or 52,354 hectares in 2019. For the same year, area of irrigated land during the dry season also increased by 6.7 percent which is equivalent to 51,249 hectares.

Chapter 15

PUBLIC ADMINISTRATION

Data on the levels, patterns, and distribution of income and expenditures of local government units (LGUs) are essential in measuring their capabilities to provide public service to their constituents. Specifically, the level of income serves as a criterion in the classification of LGUs. The classification also provides a yardstick in the allocation of resources and other forms of assistance. Furthermore, the data provide a sound and logical basis in the choice of alternative options aimed at balancing the sources and dispositions of resources. The data are also useful in identifying priority program areas and localities in the community.

This chapter presents data on the average income of provincial, city, and municipal LGUs and their income classification. The Bureau of Local Government Finance of the Department of Finance is the source of data. The chapter also includes data pertaining to the annual statements of receipts and expenditures of LGUs classified by level of government. The source of data is the Department of Budget and Management.

HIGHLIGHTS

- On the basis of the financial statements of LGUs in CAR for CYs 2004-2007, the income class of the Province of Apayao improved from 4th class to 3rd class province.
- On the municipal level for CYs 2004-2007, the income classes of 14 out of 75 municipalities improved.
- Revenue collections in the region decreased by 22.2 percent or about P6.7 billion in 2017 to 5.2 billion in 2018.

Chapter 16

MONEY & BANKING

Data pertaining to the operations of financial institutions provide indicators of the area's economy. The growth in the number of banking institutions operating in a certain locality gives insights on the pace at which business and trade grows. Data on loans granted by banks provide a picture of the level and nature of investments put up over time. Statistics on loans outstanding of financial institutions, on the other hand, serve as signals of the rate of turnover of investments. The money and banking sector plays a vital role in the development of productive activities by proprietors or corporate institutions in the area. The presence and accessibility of establishments providing these services to existing and prospective investors contribute to the realization of programs and projects aimed at industrial and entrepreneurial advancement.

This chapter presents data on the number of offices of the financial system in the region, outstanding loans of financial institutions, loans granted by banks, balance sheet accounts, income and expenses, and deposit liabilities of banks. The source of data is the Bangko Sentral ng Pilipinas.

HIGHLIGHTS

- The region net loan portfolio increased by 5.7 percent from P20.0 billion in 2018 to P21.1 billion in 2019.
- Deposits of all banks in CAR increased by 5.6 percent from P118.5 billion to P125.2 billion in 2019.
- In 2019, bulk or 82.9 percent of the total deposits in banks came for Universal and Commercial Banks, 8.5 percent from Thrift Banks and 8.6 percent from Rural and Cooperative Banks.

Chapter 17

PUBLIC ORDER, SAFETY & JUSTICE

Data on public order, safety, and justice reflect the effectively, efficiency, and fairness in the administration and enforcement of laws. The basic goal of the government is to establish a peaceful, stable, and just environment conducive to national growth and development. A society where peace, order, and law prevail is not only a goal or a vision. It forms one of the pillars of man's basic rights. Development that is not coupled with order, safety, and justice contribute to the degradation of society. The effects of public order, safety, and justice to the national well-being and in every fiber of the social and economic lives of the individuals are priority concerns of governance. In this light, an information system that generates timely and reliable data becomes a necessary tool in the administration of justice and enforcement of laws as well as to aid legislation.

This chapter presents regional/provincial/city data on crimes and number of persons arrested, number of policemen and firemen, fire incidence including property damages, law enforcement cases handled, and legal assistance extended. The sources of data are the Philippine National Police for data on crimes, persons arrested, and law enforcers; the Bureau of Fire Protection of the Department of Interior and Local Government for fire incidence; and the Public Attorney's Office and Parole and Probation Administration of the Department of Justice on cases handled and legal assistance services.

HIGHLIGHTS

- Crime incidence in CAR decreased by 55.3 percent from 7,928 in 2018 to 3,547 in 2019.
- More than half or 67.1 percent of the crimes committed in 2019 were non-index crimes (i.e., crimes against national security, violation of special laws). The 42.2 percent of the total cases of non-index crime was reported in Baguio City.
- Affected families caused by tropical cyclones increased by 5,777 percent in 2018, from 154 families in 2017 to 9,051 in 2018.

Glossary of Terms

AGRICULTURE AND AGRARIAN REFORM

Agricultural Production - the growing of field crops, fruits, nuts, seeds, tree nurseries (except those of forest trees), bulb vegetables and flowers, both in the open and under glass; and the production of coffee, tea, cocoa, rubber; and the production of livestock and livestock products, honey, rabbits, fur-bearing animals, silkworm, cocoons, etc. Forestry and fishery activities carried out as an ancillary activity on an agricultural holding is also considered as agricultural production. (**Philippine Statistics Authority**)

Animals, Slaughter - animals intended for meat production. (**National Economic and Development Authority**)

Aquaculture - sector of fisheries that includes the rearing or raising under controlled conditions of aquatic products such as fish, oysters, mussels, sea weeds and other aquatic resources in sea, lakes and rivers. Examples are fishponds, fish pens and fish cages. (**Philippine Statistics Authority**)

Area Harvested - refers to land used for agricultural operation reported as many times as it was planted and harvested to the same crop or different crops during the reference period. (**Philippine Statistics Authority**)

Cooperative - a duly registered association of at least fifteen (15) persons with a common bond of interest who voluntarily join together to achieve a lawful common social and economic end. (**Cooperative Development Authority**)

Kinds of cooperatives:

Consumers' Cooperative - the primary purpose is to procure and distribute commodities to members and non-members. (**Cooperative Development Authority**)

Cooperative Bank - organized by, the majority shares of which is owned and controlled by, cooperatives primarily to provide financial and credit services to cooperatives. (**Cooperative Development Authority**)

Cooperative Federation - an organization of primary and/or secondary cooperatives with a single line or multi-purpose business activities. (**Cooperative Development Authority**)

Cooperative Union - an organization of cooperatives and federations at appropriate levels to represent the interest and welfare of all types of cooperatives at the provincial, city, regional and national levels. (**Cooperative Development Authority**)

Credit Cooperative - promotes thrift and savings among its members and creates funds in order to grant loans for productive and provident purposes. (**Cooperative Development Authority**)

Laboratory Cooperative - a cooperative formed and managed principally by minors and which is affiliated with a registered cooperative. (**Cooperative Development Authority**)

Marketing Cooperative - engages in the supply of production inputs to members, and markets their products. (**Cooperative Development Authority**)

Multi-Purpose Cooperative - engages in two (2) or more types of business activities. (**Cooperative Development Authority**)

Producers' Cooperative - undertakes joint production whether agricultural or industrial. (**Cooperative Development Authority**)

Service Cooperative – engages in medical and dental care, hospitalization, transportation, insurance, housing, labor, electric light and power, communication and other services. (**Cooperative Development Authority**)

Crop Production – the growing of staple food crops, fruits, nut and other food crops and commercial crops. (**Philippine Statistics Authority**)

Crops, Permanent – crops which occupy the land for a long period of time and do not need to be replaced after each harvest such as fruit trees, shrubs, nuts, etc. These crops may be productive, which have already borne fruits or capable of bearing fruits, or non-productive. (**Philippine Statistics Authority**)

Crops, Temporary – crops which are grown seasonally and whose growing cycle is less than one year and which must be sown or planted again for production after each harvest. (**Philippine Statistics Authority**)

Farm – any piece or pieces of land having a total area of at least 1,000 square meters used wholly or partly for growing crops such as palay, corn, fruits, vegetables, nuts, etc., and/or tending of livestock and/or poultry, regardless of number; or any land regardless of area, used for the raising of at least 20 heads of livestock and/or poultry. (**Philippine Statistics Authority**)

Farm Area – refers to the physical or actual measurement of the land, reported only once regardless of how many times it was used during the reference period. (**Philippine Statistics Authority**)

Farmer Beneficiaries – landless residents of the same barangay or landless residents of the same municipality who are agricultural lessees and share tenants; regular farm workers; seasonal farm workers; other farm workers; actual tillers or occupants of public lands; collective or cooperatives of the above beneficiaries; and other directly working on the land. (**Department of Agrarian Reform**)

Fishing, Commercial – sector of fisheries that includes the catching of fish in marine waters with the use of fishing boat of more than three (3) gross tons. (**Philippine Statistics Authority**)

Fishing, Municipal – sector of fisheries that includes the catching of fish in marine and inland waters with the use of fishing boat of three (3) gross tons or less, or using gear not requiring the use of boats. (**Philippine Statistics Authority**)

Livestock – domesticated animals with four legs and with hoofs. The different livestock are carabaos, cattles, goats, horses, rabbits, etc. (**Philippine Statistics Authority**)

Parcel – one contiguous piece of land under one form of tenure without regard to land use. A piece of land is contiguous if it is not separated by natural or man-made boundaries that are not part of the farm/holding. (**Philippine Statistics Authority**)

Poultry – are classified as chickens whether native or hybrid, ducks, quails, geese, etc. (**Philippine Statistics Authority**)

ECONOMIC ACCOUNTS

Constant Prices (at constant prices) – valuation of transactions, wherein the influence of price changes from the base year to the current year has been removed.

Current Prices (at current prices) – the value based on prices during the reference year; nominal value.

Expenditure on the GDP - Sum of the final uses of goods and services in the economy. Final uses refer to the values at purchaser's prices of goods and services used for the final consumption of households and private non-profit institutions, general government both national and local government units, as well as those used for gross fixed capital formation by both public and private enterprises and for exports (net of imports) to the rest of the world. (**Source: Analysis of the Revised PSNA and Manual on the Frameworks, Source and Methods**)

Gross Domestic Capital Formation - Consists of two major components:

gross fixed capital formation and
change in stocks.

Gross fixed capital formation refers to outlays on construction, durable equipment and breeding stocks, orchard development and afforestation. **Change in stocks** refers to the difference between ending and beginning inventories. Inventories or stocks consist of finished goods, work-in-progress, and raw materials, which have been produced or purchased but not yet sold or consumed as intermediate inputs during the accounting period. (Source: **Manual on the Philippine System of National Accounts: Framework, Sources and Methods**)

Gross Domestic Product (GDP) - the value of all goods and services produced domestically; the sum of gross value added of all resident institutional units engaged in production (plus any taxes, and minus any subsidies, on products not included in the values of their outputs).

Gross Regional Domestic Product (GRDP) - aggregate of the gross value added or income from each industry or economic activity of the regional economy.

Gross Value Added - the difference between gross output and intermediate inputs. Gross outputs of a production unit during a given period is equal to the gross value of the goods and services produced during the period and recorded at the moment they are produced, regardless of whether or not there is a change of ownership. Intermediate inputs refer to the value of goods and services used in the production process during the accounting period.

Per Capita - estimates expressed as the ratio of a particular transaction like GRDP over total population. This is referred to as per capita GRDP.

Personal Consumption Expenditures - consist of actual and imputed expenditures of households for the purpose of acquiring individual consumption goods and services.

Source: 1993 System of National Accounts developed by the Commission of the European Communities, International Monetary Fund, Organisation for Economic Cooperation and Development, United Nations and World Bank.

EDUCATION

Cohort Survival Rate ***** - the percentage of enrollees at the beginning grade or year in a given school year who reached the final grade or year of the elementary or secondary level.

Completion Rate - the percentage of first year entrants in a cycle of education surviving to the end of the cycle. (Department of Education)

Drop-out Rate - the proportion of pupils/students who leave school during the year as well as those who complete the grade/year level but fail to enroll to the next grade/year level the following school year to the total number of pupils/students enrolled during the previous school year. (Department of Education)

Elementary Education - the first stage of free and compulsory, formal education primarily concerned with providing basic education and usually corresponding to six and seven grades. Elementary education can likewise be attained through alternative learning system. (Department of Education)

Enrolment ***** - total number of pupils/students who register/enlist in a school year.

Enrolment Ratio, Gross - the total enrolment in a given level of education as a percentage of the population which according to national regulations should be enrolled at this level. It is a measure of the "capacity" of a region's elementary or secondary schools. (Department of Education)

Formal Education - the systematic and deliberate process of hierarchically structured and sequential

learning corresponding to the general concept of elementary and secondary level of schooling. At the end of each level, the learner needs a certification in order to enter or advance to the next level. **(Department of Education)**

Graduation Rate – the proportion of pupils/students who finished Grade VI/Fourth Year in the present year to the number of pupils/students who enrolled in Grade VI/Fourth Year in the present year. **(Department of Education)**

Higher Education - the stage of formal education requiring secondary and post-secondary education covering the programs on: (a) all courses of study leading to bachelor's degree and (b) all degree courses of study beyond bachelor's degree level. **(Commission on Higher Education)**

Highest Educational Attainment or Highest Grade Completed – refers to the highest grade or year completed in school, college or university, by person 5 years of age and over. **(Philippine Statistics Authority)**

Literacy – the ability to read and write a simple message. **(Philippine Statistics Authority)**

Literacy, Basic or Simple - the ability to read and write with understanding simple messages in any language or dialect. **(Philippine Statistics Authority)**

Literacy, Functional - represents a significantly higher level literacy which includes not only reading and writing skills but also numeracy skills. This skill must be sufficiently advanced to enable the individual to participate fully and effectively in activities commonly occurring in his life situation that require a reasonable capability of communicating by written language. **(Philippine Statistics Authority)**

Literacy Rate, Simple/Basic ***** - the percentage of the population 10 years old and over, who can read, write and understand simple messages in any language or dialect.

Participation Rate ***** - the ratio of the enrolment for the age group corresponding to the official school age in the elementary/secondary level to the population of the same age group in a given year. Also known as Net Enrolment Ratio (NER).

Literate – a person who can both read and write a simple message in any language or dialect. **(Philippine Statistics Authority)**

Performance Indicators – refer to several key indicators that can be computed and utilized for evaluating the educational system's performance at various levels, using the data available in the education statistics data bank. These indicators constitute an important component of a management information system. **(Department of Education)**

Post Secondary/Non-Degree Education - the stage of formal education following the secondary level covering non-degree programs that have varying duration from three (3) months to three (3) years, concerned primarily with developing strong and appropriately trained middle-level skilled manpower possessing capabilities supportive of national development. **(Department of Education)**

Pre-School - a school that admits students who are not old enough to enter the first level of education. These pupils are usually from 4 to 5 years of age. **(Department of Education)**

Primary School - a school primarily concerned with providing basic education and usually corresponding to the first four grades of elementary education. **(Department of Education)**

Private Institutions/Schools - educational institutions maintained and administered by private individuals or groups. **(Department of Education)**

Public Institutions/Schools – educational institutions established by law and administered by the government. **(Department of Education)**

Repetition Rate – the proportion of pupils who enroll in the same grade/year more than once to the total number of pupils/students enrolled in that grade/year during the previous year. **(Department of Education)**

Education)

Retention Rate – the proportion of the enrolment in any school year that continues to be in school the following year. **(Department of Education)**

School – institution recognized by the state which undertakes educational operations. **(National Economic and Development Authority)**

School Year – the period of time, of approximately 32 to 40 weeks, when schools offer daily instruction broken by short intermission periods (e.g., Christmas and summer vacations and holidays). **(National Economic and Development Authority)**

Secondary School - an educational institution offering secondary education usually consisting of a four-year general secondary curricula. **(Department of Education)**

Secondary Education - the stage of formal education following the elementary level concerned primarily with continuing basic education and expanding it to include the learning of employable gainful skills, usually corresponding to four years of high school. **(Department of Education)**

School Year - the prescribed period of time, when schools offer daily instruction broken by short intermission periods (e.g., Christmas and summer vacations and holidays). **(National Economic and Development Authority)**

Student – one who regularly attends an educational institution of secondary or higher level. **(National Economic and Development Authority)**

Teacher – person engaged in actual teaching of a group of pupils/students on full-time or part-time basis. **(National Economic and Development Authority)**

Tertiary Education – the level of education covering post-secondary and higher education. **(Department of Education)**

Teacher-Pupil/Student Ratio – Gross – the proportion of the number of authorized positions for teachers at a certain level in a given year to the enrolment at the same level in the same year. **(Department of Education)**

Teacher-Pupil/Student Ratio – Net – the proportion of the number of teachers actually teaching at a certain level in a given year to the enrolment at the same level in the same year. **(Department of Education)**

Transition Rate – the percentage of pupils who graduate from one level of education and move on to the next higher level (from primary to intermediate; from intermediate to secondary). **(Department of Education)**

ENERGY AND WATER RESOURCES

Distribution of Electricity - Refers to the conveyance or delivery of electricity by a distribution utility to end-users.

Electric Cooperative - Refers to a cooperative or corporation authorized to provide electric service pursuant to Presidential Decree No. 269, as amended, or Republic Act No. 6938.

Electricity Sales - Refers to the sales proceeds derived by the power producer from the actual generation of the energy-generating facility net of station own use and losses.

Generation of Electricity - Refers to the production of electricity by a generation or co-generation facility.

Irrigation - the practice of artificially providing land with water to increase its agricultural productivity. **(Philippine Statistics Authority)**

Irrigation System, Communal - an irrigation system owned by the community, association, farmers' cooperative, etc. (Philippine Statistics Authority)

Irrigation System, Individual - an irrigation means provided personally by the operator for his holding's/farm's irrigation needs. It could be rented borrowed, or owned by him or by any member of the household. (Philippine Statistics Authority)

Irrigation System, National - a government owned irrigation system built or constructed to provide continuous supply of water for agricultural purposes to farmers in exchange for a fee. (Philippine Statistics Authority)

National Electrification Administration (NEA) - Refers to the government agency created under Presidential Decree No. 269, to act as a catalyst for the development of electric distribution utilities (EDUs) by providing world-class financial intermediation institutional and technical services.

National Power Corporation (NPC) - Refers to the government corporation created under Republic Act No. 6395, committed to the highest standards of customers satisfaction in providing quality and reliable electricity with due care for society and the environment.

Potential Irrigable Service Area - the maximum area which an irrigation project can serve considering the extent of arable lands and the available water supply. In case of an existing irrigation system, the potential irrigable area is limited to the areas that can be commanded by the present operating level at the dimension point. (Philippine Statistics Authority)

ENVIRONMENT AND NATURAL RESOURCES

Air Pressure - the pressure exerted by the earth's atmosphere at any given point. (Random House Webster's College Dictionary)

Agricultural Land - land devoted to or suitable for the cultivation of the soil, planting of crops, growing of trees, raising of livestock, poultry, fish or aquaculture production, including the harvesting of such farm products, and other farm activities and practices performed in conjunction with such farming operations by persons whether natural or judicial and not classified by laws as mineral land, forest land, commercial land, and industrial land. (NSCB Resolution No. 7 Series of 2010)

Brushland - degraded or untimbered areas dominated by a discontinuous cover of shrubby vegetation. (National Mapping and Resource Information Authority)

Fishpond - a body of water (artificial or natural) where fish and other aquatic products are cultured, raised or cultivated under controlled conditions. (National Mapping and Resource Information Authority)

Forest* - refers to land with an area of more than 0.5 hectare and tree crown cover (or equivalent stocking level) of more than 10 percent. The trees should be able to reach a minimum height of 5 meters at maturity in situ. It consists either of closed forest formations where trees of various storeys and undergrowth cover a high proportion of the ground or open forest formations with a continuous vegetation cover in which tree crown cover exceeds 10 percent. Young natural stands and all plantations established for forestry purposes, which have yet to reach a crown density of more than 10 percent or tree height of 5 meters are included under forest.

These are normally forming part of the forest area, which are temporarily unstocked as a result of human intervention or natural causes but which are expected to revert to forest. It includes forest nurseries and seed orchards that constitute an integral part of the forest; forest roads, cleared tracts, firebreaks and other small open areas; forest within protected areas; windbreaks and shelter belts of trees with an area of more than 0.5 hectare and width of more than 20 meter; plantations primarily used for forestry purposes, including rubber wood plantations. It also includes bamboo, palm and fern formations (except coconut and oil palm). (Reference: Food and Agriculture Organization, 2000)

Forest, Classified Land – includes the public forest, the permanent forest or forest reserves, and forest reservations. (Forest Management Bureau)

Forest, Dipterocarp – a forest type dominated by trees of the dipterocarp species, such as red lauan, tanguile, tiaong, white lauan, almon, bagtikan, and mayapis of the Philippine mahogany group, apitong and the yakals. (National Mapping and Resource Information Authority)

Forest, Mangrove – the type of forest occurring on tidal flats along the sea coast extending along the streams where the water is brackish and composed mainly of bakauan, potolan, langarai, api-api, nipa palm and the like. (National Mapping and Resource Information Authority)

Forest, Mossy – a tropical rain forest of the high elevations dominated by Podocarpaceae, Myrtaceae and Fagaceae with trees of medium height and short boled, covered epiphytes. (National Mapping and Resource Information Authority)

Forest, Old Growth – forest predominantly stocked with mature trees with less than 25 percent of the mature stand volume removed by cutting. (National Mapping and Resource Information Authority)

Forest Product - all usable raw materials yielded by the forest including the associated water, fish, game, scenic, historical, recreational and geologic resources. (Forest Management Bureau)

Forest, Unclassified Land – also known as public forest. Land of the public domain which has not been the subject of the present system of classification for the determination of which lands are needed for forest purposes and which are not. (National Mapping and Resource Information Authority)

Game Refuge and Bird Sanctuary – refers to a forest land designated for the protection of game animals, birds and fish and closed to hunting and fishing in order that the excess population may flow and re-stock surrounding areas. (National Mapping and Resource Information Authority)

Land, Alienable and Disposable – refers to those lands of the public domain which have been the subject of the present system of classification and declared as not needed for forest purposes. (National Mapping and Resource Information Authority)

Land Classification – refers to the establishment of boundaries between alienable and disposable lands and forest lands. (National Mapping and Resource Information Authority)

Land Use – the manner of utilizing the land, including its allocation, development and management. (NSCB Resolution No. 7 Series of 2010)

Minerals, Metallic – minerals with a high specific gravity and metallic luster, such as titanium, rutile, tungsten, uranium, tin, lead, iron, etc. In general, the metallic minerals are good conductors of heat and electricity. (National Mapping and Resource Information Authority)

Minerals, Non-Metallic – of or pertaining to a non-metal. In general, of mineral luster other than metallic. Non-metals are naturally occurring substances that do not have metallic properties such as high luster, conductivity, opaqueness and ductility. (National Mapping and Resource Information Authority)

National Park – forest reservation essentially of natural wilderness character which has been withdrawn from settlement, occupancy or any form of exploitation except inconformity with approved management plan and set aside as such exclusively to conserve the area or preserve the scenery, the natural and historic objects, wild animals and plants therein to provide enjoyment of these features in such areas. (NSCB Resolution No. 7 Series of 2010)

Ore – a mineral or aggregate of minerals which contain sufficient grade and quantity to be mined and beneficiated at a profit. The mineral or rock can be further described depending on the major element contained e.g., copper ore, gold ore, chromite ore, etc. (National Mapping and Resource Information Authority)

Non-Timber Forest Product - includes all forest products except timber; also known as minor forest product. (Forest Management Bureau)

Poles and Piles – logs for use as electric post, pier piling, railroad ties, sleepers and the like. (**Forest Management Bureau**)

Rainfall (mm) - the amount of precipitation (rain, hail, etc.) expressed in millimeter depth, of the layer of water which has fallen. (**Philippine Atmospheric, Geophysical and Astronomical Services Administration**)

Relative Humidity – the amount of water vapor in the air, expressed as a percentage of the maximum amount that the air could hold at the given temperature. (**Random House Webster's College Dictionary**)

Reservation – refers to any tracts(s) of the public domain proclaimed by the President of the Philippines for government use or any of its branches or instrumentalities or of the inhabitants thereof, for public or quasi-public uses or purposes. The different reservations are as follows: (a) *Civil* – refers to lands of public domain which have been proclaimed by the President of the Philippines for specific purposes such as townsites, resettlement areas, ancestral lands, etc.; (b) *Forest* – refers to forest lands which have been reserved by the President of the Philippines for any specific purpose or purposes; (c) *Military* – refers to land of the public domain which has been proclaimed by the President of the Philippines for military purposes such as Airbase, Campsite, Docks and Harbors. Firing Range, Naval Base, Target Range, Wharves, etc.; and (d) *Watershed* – a forest land reservation established to protect or improve the condition of the water yield thereof or reduce sedimentation. (**National Mapping and Resource Information Authority**)

Temperature – the degree of warmth or coldness. (**Random House Webster's College Dictionary**)

Timberland – refers to land of the public domain which has been the subject of the present system of land classification determined to be needed for forest purposes. Eventually, these lands will be proclaimed as forest reserves by the President. (**Forest Management Bureau**)

Watershed – a land area drained by a stream or fixed body of water and its tributaries having a common outlet for surface runoff. (**NSCB Resolution No. 7 Series of 2010**)

INCOME AND PRICES

Consumer Price Index (CPI)*** – Indicator of the change in the average prices of a fixed basket of goods and services commonly purchased by households relative to a base year.

Family – is a group of persons usually living together and composed of the head and other persons related to the head by blood, marriage and adoption. A single person living alone is considered a separate family. (**2000 FIES, Philippine Statistics Authority (PSA)**)

Family Expenditures – refers to the expenses or disbursements made by the family purely for personal consumption during the reference period. They exclude all expenses in relation to farm or business operations, investment ventures, purchase of real property and other disbursements which do not involve personal consumption. Gifts, support, assistance or relief in goods and services received by the family from friends, relatives, etc. and consumed during the reference period are included in the family expenditures. Value consumed from net share of crops, fruits and vegetables produced or livestock raised by other households, family sustenance and entrepreneurial activities are also considered as family expenditures. (**2000 FIES, PSA**)

Family Income – includes primary income and receipts from other sources received by all family members during the calendar year as participants in any economic activity or as recipients of transfers, pensions, grants, etc. (**2000 FIES, PSA**)

Primary income includes:

Salaries and wages from employment.

Commissions, tips, bonuses, family and clothing allowance, transportation and representation allowance and honoraria.

Other forms of compensation and net receipts derived from the operation of family-operated

enterprises/activities and the practice of profession or trade.

Income from other sources include:

Imputed rental values of owner-occupied dwelling units.

Interests.

Rentals including land owner's share of agricultural products

Pensions

Support and value of food and non-food items received as gifts by the family (as well as the imputed value of services rendered free of charge to the family).

Receipts from family sustenance activities, which are not considered as family operated enterprise.

Family Size – refers to the total number of family members enumerated. Included as family members are those whose relationship to the household head is a wife, son, daughter, father, mother, son-in-law, daughter-in-law, sister, brother, granddaughter and grandson or other relative. (**Philippine Statistics Authority**)

Food Threshold (FT) ***** – the minimum income/expenditure required for a family/individual to meet the basic food needs, which satisfies the nutritional requirements for economically necessary and socially desirable physical activities.

Gini Ratio ***** - the ratio of the area between the Lorenz curve and the diagonal (the line of perfect equality) to the area below the diagonal. It is a measure of the extent to which the distribution of income/expenditure among families/individuals deviates from a perfectly equal distribution, with limits 0 for perfect equality and 1 for perfect inequality.

Income Decile – Two levels of income deciles were utilized in the Family Income and Expenditures Survey (FIES) – national and regional. The national income decile is obtained by ranking the weighted total family income of all sample families in the Philippines from lowest to highest. Then these are grouped into tens. The first tenth, meaning those with the lowest income, is called the first decile, the second tenth, second decile and so on. A similar procedure is implemented for the regional decile, except that what is arrayed is the weighted total family income of sample families in a given region. (**Philippine Statistics Authority**)

Inflation Rate - the annual rate of change or the year-on-year change in the Consumer Price Index.

Magnitude of the Poor - the number of families or the population whose annual per capita income falls below the poverty threshold.

Poverty Incidence (PI) ***** - the proportion of families/individuals with per capita income/ expenditure less than the per capita poverty threshold to the total number of families/individuals.

Poverty Threshold (PT) ***** – the minimum income/expenditure required for a family/ individual to meet the basic food and non-food requirements. Basic food requirements are currently based on 100% adequacy for the Recommended Energy and Nutrient Intake (RENI) for protein and energy equivalent to an average of 2000 kilocalories per capita per day, and 80% adequacy for other nutrients. On the other hand, basic non-food requirements, indirectly estimated by obtaining the ratio of food to total basic expenditures from a reference group of families, cover expenditure on: 1) clothing and footwear; 2) housing; 3) fuel, light, water; 4) maintenance and minor repairs; 5) rental of occupied dwelling units; 6) medical care; 7) education; 8) transportation and communication; 9) non-durable furnishings; 10) household operations; and 11) personal care & effects.

Purchasing Power of the Peso*** - a measure of the real value of the peso in a given period relative to a chosen reference period. It is computed by getting the reciprocal of the CPI and multiplying the result by 100.

Source of Income, Main – refers to the source from which most of the income of the family is obtained. If the family has more than one source of income, the main source that would be considered is the source where the bulk of income is derived. Main sources of income could either be: (a) **Salaries and Wages** – includes all forms of compensation whether in cash or in kind received by family members who are regular or occasional/seasonal workers in agricultural and non-agricultural industries; (b) **Entrepreneurial Activity** – or a family-operated activity is any economic activity, business or enterprise whether in agricultural or in

non-agricultural enterprises, engaged by any member of the family as an operator or as self-employed. Included as family-operated activities are those which are operated as single proprietorship or loose partnership (without formal organizations). Thus, partnerships, corporations, associations, etc. which are formally organized are excluded; or (c) **Other Sources** – refer to the sources of income other than work. Other sources of income include net share of crops, fruits and vegetables and livestock, poultry from other households; cash receipts, gifts and other forms of assistance from abroad; cash receipts, support, assistance and relief from domestic source; rental from non-agricultural lands, buildings, spaces and other properties; interest from dividends and loans; pension and retirement, workmen's compensation and social security benefits; imputed rental value of owner-occupied dwelling units; net receipts from family sustenance activities; dividends from investment; goods and services received as gifts; and other sources of income not elsewhere classified. (Philippine Statistics Authority)

Subsistence Incidence (S) ***** - the proportion of families/individuals with per capita income/ expenditure less than the per capita food threshold to the total number of families/ individuals.

ESTABLISHMENT CHARACTERISTICS: INDUSTRIAL SECTOR

Capital Increase – the additional funds put into the capital stock of existing business firms. (Bangko Sentral ng Pilipinas)

Capital Investment – the amount of capital invested by a newly registered organization whether a corporation, partnership or single proprietorship. (Bangko Sentral ng Pilipinas)

Construction – this group includes construction, alteration, repair and demolition of building, highways, streets and culverts; construction of such projects as sewers and water, gas and electricity mains; railways, roadbeds, railroads, piers, tunnels, elevated highways, bridges, viaducts; dams, drainage projects, sanitation projects, aqueducts, irrigation and flood control projects; hydroelectric plants, water power projects; pipelines; marine construction such as dredging, underwater rock removal; pile driving, land reclamation; construction of harbors and waterways; water wells; airports and parking areas; athletic fields, golf courses, swimming pools, and tennis courts; communication systems such as telephone and telegraph lines; and other construction whether undertaken by private bodies or government authorities. Special trade contractors in the field of construction such as carpenters, plumbers, plasterers and electricians are also included in this group. (Philippine Statistics Authority)

Establishment – an economic unit which engages in one or predominantly one kind of economic activity at a fixed single physical location. (Philippine Statistics Authority)

Investments - amount of money or other resources measured in terms of money placed on activities or other forms of assets for the purpose of earning profits. (Board of Investment)

Stocks - investments in shares of stock, common or preferred, traded, subsidiaries, and non-subsidaries. (Securities and Exchange Commission)

Subscription Capital – that portion of the authorized capital which has been underwritten by the stockholders. (Bangko Sentral ng Pilipinas)

LABOR AND EMPLOYMENT

Collective Bargaining Agreement (CBA) – the negotiated contract between a legitimate labor organization and the employer concerning wages, hours of work, and all other terms and conditions of employment in a bargaining unit, including mandatory provisions for grievance and arbitration machinery. (Philippine Statistics Authority)

Employed - include all those who, during the reference period are 15 years old and over as of their last

birthday and are reported either:

At work. Those who do any work even for one hour during the reference period for pay or profit, or work without pay on the farm or business enterprise operated by a member of the same household related by blood, marriage or adoption; or

With a job but not at work. Those who have a job or business but are not at work because of temporary illness/injury, vacation or other reasons. Likewise, persons who expect to report for work or to start operation of a farm or business enterprise within two weeks from the date of the enumerator's visit, are considered employed. **(Philippine Statistics Authority)**

Employment Rate - proportion in percent of the total number of employed persons to the total number of persons in the labor force. **(Philippine Statistics Authority)**

Labor Force – the population 15 years old and over whether employed or unemployed who contribute to the production of goods and services in the country. **(Philippine Statistics Authority)**

Labor Force Participation Rate – proportion in percent of the total number of persons in the labor force to the total population 15 years old and over. **(Philippine Statistics Authority)**

Overseas Contract Worker (OCW) - any individual who was or is presently engaged in gainful employment in a foreign country, covered by a specific "contract of employment" defining the terms and conditions of that employment and the employer-employee relationship, provided that the herein referred contract was approved for implementation/application by the Philippine Overseas Employment Administration (POEA) and the deployment/mobilization having been authorized by the POEA and provided further that the corresponding Welfare Fund Contribution having been paid at the time of employment processing at POEA or at any time thereafter as in the case of legitimized overseas contract worker, the latter gaining recognition thru the process of latent legitimacy in accordance with applicable rules and policies in applicable case/s. The OCW may be landbased or seabased

Overseas Filipino Worker (OFW) – a Filipino worker who is to be engaged, is engaged, or has been engaged in a remunerated activity in a country of which he/she is not a legal resident. **(Philippine Statistics Authority)**

Salaries and Wages - payments in cash or in kind prior to deductions for employees' contribution to SSS/GSIS, withholding tax, etc. to all employees. Included are total basic pay, overtime pay and other benefits. **(Philippine Statistics Authority)**

Underemployed – include all employed persons who express the desire to have additional hours of work in their present job or an additional job, or to have a new job with longer working hours. **(Philippine Statistics Authority)**

Underemployed, Invisibly – persons employed at full-time jobs but who still want additional work. **(Philippine Statistics Authority)**

Underemployed, Visibly - those who worked for less than 40 hours during the reference period and want additional hours of work. **(Philippine Statistics Authority)**

Underemployment Rate – proportion in percent of the total number of underemployed persons to the total number of employed persons. **(Philippine Statistics Authority)**

Unemployed**** - include all persons who are 15 years old and over as of their last birthday and are reported as:

without work, i.e., had no job or business during the basic survey reference period; AND

currently available for work, i.e., were available and willing to take up work in paid employment or self employment during the basic survey reference period, and/or would be available and willing to take up work in paid employment or self employment within two weeks after the interview date; AND

seeking work, i.e., had taken specific steps to look for a job or establish a business during the basic survey reference period; OR not seeking work due to the following reasons: (a) tired/believe no work available, i.e., the discouraged workers who looked for work within the last six months prior to the interview date; (b) awaiting results of previous job application; (c) temporary illness/disability; (d) bad weather; and (e) waiting for rehire/job recall.

Unemployment Rate – proportion in percent of the total number of unemployed persons to the total number of persons in the labor force. **(Philippine Statistics Authority)**

Union – any registered group or association of employees that exist in whole or in part for the purpose of collective bargaining or of dealing with employers concerning terms and conditions of employment. A union may be formed in the private or public sector. **(Philippine Statistics Authority)**

MONEY AND BANKING

Banking Institutions – corporations, companies or associations which are engaged in the lending of funds obtained from the public through the receipt of deposits and the sale of bonds, securities or obligations of any kind. **(Philippine Statistics Authority)**

Commercial Banks – any corporation which, in addition to the general powers incident to corporations, shall have all such powers as shall be necessary to carry on the business of commercial banking, by accepting drafts and issuing letters of credits, by discounting and negotiating promissory notes, drafts, bills of exchange, and other evidences of debts, by receiving deposits, by buying and selling foreign exchange and gold or silver bullion, and by lending money against securities consisting of personal property or first mortgage on improved real estates and the insured improvements thereon. **(Bangko Sentral ng Pilipinas)**

Financial Institutions, Non-Bank – persons or entities whose principal functions include the lending, investing, or placement of funds or evidences of equity deposited with them, or otherwise coursed through them, either for their own account or for the account of others. **(Philippine Statistics Authority)**

Financing - means by which a government provides financial resources to cover a budget deficit or allocated financial resources arising from a budget surplus.

Investment House – an enterprise engaged in guaranteed underwriting of securities of another person or enterprise, including securities of government and its instrumentalities. **(Philippine Statistics Authority)**

Non-Stock Savings and Loan Associations – a corporation whose capital stock is required or is permitted to be paid in by the stockholders in regular, equal periodic payments of its stockholders to repay to said stockholders their accumulated savings and profits upon surrender of their shares, to encourage industry, frugality, and home building among the stockholders on the security of unencumbered real estate and the pledge of shares of the capital stock owned by such stockholders as collateral security. **(Philippine Statistics Authority)**

Pawnshop – a business establishment engaged in lending money on personal property delivered as security of pledge. **(Philippine Statistics Authority)**

Private Development Banks - a group of quasi-private development banks promoted by the DBP to provide medium and long term credits to both the agricultural and industrial sectors. Designed to supplement the short-term credits of the Rural Banks and are able to accept only savings and time deposits. **(Philippine Statistics Authority)**

Rural Banks - government-sponsored/assisted banks which are privately managed and largely privately owned that provide credit facilities to farmers and merchants, or to cooperatives of such farmers or merchants at reasonable terms and in general to the people of the rural community. **(Philippine Statistics Authority)**

Savings and Mortgage Banks - any corporation organized for the purpose of accumulating the small savings of depositors and investing them, together with its capital, in bonds or in loans secured by bonds, real estate mortgage, and other forms of security, as hereinafter provided, or in loans for personal finance and long-term financing for home building and home development. **(Philippine Statistics Authority)**

Specialized Government Banks - these are completely government-owned institutions established mainly to provide medium and long-term credits to the industrial, agricultural and real estate sectors of the economy. **(Philippine Statistics Authority)**

Stock Savings and Loan Associations - these are banks engaged in the accumulation of savings mainly of stockholders in specified undertakings. They are primarily concerned with servicing the needs of the household by providing personal finance and long term financing for home building and development. (Savings and Loan Association Act or RA No. 3779, as amended) **(Bangko Sentral ng Pilipinas)**

POPULATION AND HOUSING

Age Dependency Ratio - the percentage of persons in the ages defined as dependent (under 15 and over 65 years) to those in the ages defined as economically productive (15 to under 65 years) in the population. **(Philippine Statistics Authority)**

Dwelling Unit - one or more habitable rooms which are occupied or which are intended or designated to be occupied by one family with facilities for living, sleeping, cooking and eating. **(National Economic and Development Authority)**

Household*** - a social unit consisting of a person living alone or a group of persons who sleep in the same housing unit and have a common arrangement in the preparation and consumption of food.

Household Head - the person responsible for the care and organization of the household. He/She usually provides the chief source of income for the household. In the case of a household consisting of two or more unrelated persons sharing the same cooking facilities and meals, the head is usually the eldest male or female in the group regarded as such by the other members. **(Philippine Statistics Authority)**

Household Population - the aggregate of private household population. Compared to total population, this excludes population enumerated in institutional households such as national/provincial/municipal/city jails/detention centers, military camps, tuberculosis pavilions, mental hospitals, leprosaria/leper colonies or drug rehabilitation centers. **(Philippine Statistics Authority)**

Household Size - number of usual members in a private household. **(National Economic and Development Authority)**

Housing Unit - a structurally separate and independent place of abode which, by the way it has been constructed, converted or arranged is intended for habitation by one household. Structures or parts of structures which are not intended for habitation such as commercial, industrial, and cultural buildings or natural and man-made shelters such as caves, boats, abandoned trucks, culverts, and others, but which are used as living quarters by households.

Human Development Index*** - a measure of how well a country has performed, not only in terms of real income growth, but also in terms of social indicators of people's ability to lead a long and healthy life, to acquire knowledge and skills, and to have access to the resources needed to afford a decent standard of living.

Marital Status*** - status of an individual in relation to marriage, classified as follows: a) Single - A person who has never been married; b) Married - A couple living together as husband and wife, legally or consensually; c) Divorced - A person whose bond of matrimony has been dissolved legally and who therefore can remarry; d) Separated - A person separated legally or not from his/her spouse because of marital discord or misunderstanding; and e) Widowed - A person whose bond of matrimony has been dissolved by death of his/her spouse.

Medium Assumption - moderate fertility decline and moderate mortality decline

Migration*** - the movement of people across a specific boundary for the purpose of establishing a new or semi-permanent residence. Two distinct types are international migration (migration between countries) and internal migration (migration within a country).

Mother Tongue - refers to the language/dialect spoken by a person at his earliest childhood or the language/dialect that person first learned to speak. Data on mother tongue are used primarily in the analysis of the ethnic origin of a person long after assimilation to the other customs of the majority population has taken place. **(Philippine Statistics Authority)**

Population*** - total number of individuals in a territory at a specified time. It covers both nationals and aliens, native and foreign-born persons, internees, refugees and any other group physically present within the borders of a country at a specified time. In assembling national demographic statistics for publication, the basic aim has been to obtain data for the physically present (or "de facto") population rather than for the legally established resident (or "de jure") inhabitants.

Population Density*** - refers to the number of persons per unit of land area (usually in square kilometers). This measure is more meaningful if given as population per unit of arable land.

Population Distribution*** - the patterns of settlement and dispersal of a population.

Population Growth Rate*** - indicates how fast a population increases or decreases as a result of the interplay of births, deaths, and migration during a given period of time. Where the population is closed, meaning no migration, the population growth rate is the same as the rate of natural increase, i.e., the difference between the number of births and the number of deaths during a specified period of time. The three methods for computing the rate of growth based on the assumption with respect to the change are: arithmetic change, geometric change and exponential change.

Population Projections*** - computation of future changes in population numbers, given certain assumptions about future trends in the rates of fertility, mortality and migration. Demographers often publish high, medium, and low projections of the same population based on different assumptions of how these rates will change in the future.

Population Pyramid - diagram depicting the age-sex structure of a given population. **(National Economic and Development Authority)**

Sex Ratio*** - the number of males per 100 females in a population.

PUBLIC ADMINISTRATION

Barangay - the smallest political unit into which cities and municipalities in the Philippines are divided. It is the basic unit of the Philippine political system. It consists of less than 1,000 inhabitants residing within the territorial limit of a city or municipality and administered by a set of elective officials, headed by a barangay chairman (punong barangay).

Capital Revenue - resources realized from the sale of fixed or capital assets, such as building, equipment, machine and intangibles

City - there are three classes of cities in the Philippines: the highly urbanized, the independent component cities which are independent of the province, and the component cities which are part of the provinces where they are located and subject to their administrative supervision.

Extraordinary Income - collections derived from the repayment of loans and advances made by the government as well as from other non-recurring sources.

General Public Services - this covers expenditures for services which are indispensable to the existence of an organized state and cannot be allocated to specific sectors or subsectors. This includes executive and legislative services; overall financial and fiscal services; civil services; planning; conduct of foreign affairs; general research, public order and safety and centralized services.

Grants - all non-repayable transfers received from other levels of government or from private individuals, or institutions including reparations and gifts given for particular projects or programs, or for general budget support.

Municipality - is a political corporate body which is endowed with the facilities of a municipal corporation, exercised by and through the municipal government in conformity with law. It is a subsidiary of the province which consists of a number of barangays within its territorial boundaries, one of which is the seat of government found at the town proper (poblacion).

Non-Tax Revenue - revenue collected from sources other than compulsory tax levies. Includes those collected in exchange for direct services rendered by government agencies to the public, or those arising from the government's regulatory and investment activities.

Province - the largest unit in the political structure of the Philippines. It consists, in varying numbers, of municipalities and, in some cases, of component cities. Its functions and duties in relation to its component cities and municipalities are generally coordinative and supervisory.

Revenue - a cash inflow which does not increase the liability of the government.

Taxes on Income and Profit - taxes imposed on all taxable income earned or received by a taxpayer whether an individual, partnership, or corporation, during a particular period of time, usually lasting one year.

Source: **Department of Budget and Management**

PUBLIC ORDER, SAFETY AND JUSTICE

Cases Handled - the summation of cases pending at the beginning of the period and new cases received during the reference period. (**Philippine Statistics Authority**)

Cases Pending - cases which have not yet been disposed of at the beginning (or at the end) of the reference period. (**Philippine Statistics Authority**)

Crime - is an act in violation of penal law. For statistical purposes, only crimes reported to authorities are covered.

Crime Incidence - the number of crimes reported as to index or non-index crimes within a given period.

Crime Rate - number of crimes committed per 100,000 population. (**Philippine National Police**)

Fire Incidence - refers to the volume of incidents caused by fire and the deaths, injuries and total value of property loss due to this incident.

Fireman-to-Population Ratio - is an indicator that measures the adequacy of the firefighting manpower to safeguard the people and property. It is computed by dividing the total population by the total number of firemen.

Index Crimes - refer to those violations of the penal code considered to have socio-economic significance, and occur with sufficient regularity to be meaningful. These include crimes versus person (murder, homicide, physical injury and rape), and crimes versus property (robbery and theft).

Non-Index Crimes - refer to all other crimes not classified as index crimes. These are mostly composed of victimless offenses (e.g., crimes against national security, crimes against the fundamental laws of the state,

crimes against public order, crimes against public morals, and violations of special laws).

Policeman-to-Population Ratio - is an indicator that measures the adequacy of the police force in its task of promoting peace and order, and of providing security to the people and property. It is computed by dividing the total population by the total number of policemen.

SOCIAL SERVICES

Social Services - this covers expenditures for education, health, social security, labor and employment, housing and community development and other social activities.

Battering - an act of inflicting physical harm on a woman resulting to physical and psychological/emotional distress preventing her from doing what she wishes or forcing her to behave in a manner that is unacceptable to her.

Illegal Recruitment - refers to victims who were recruited usually for a fee for various forms of local or foreign employment but ended up being victimized, i.e., no job placement were effected or who were actually job-placed but under exploitative/oppressive conditions (low salaries, long hours of work, etc.) and have lost their jobs.

Involuntary Prostitution - refers to victims who were recruited for various forms of employment such as receptionists, waitresses, entertainers, dancers, household help who are later on forced into prostitution.

Sexual Abuse - an act, which is sexual in nature, committed against a woman without her consent. Sexual abuses include but are not limited to the following: rape, sexual harassment, acts of lasciviousness; treating a woman as a sex object; making demeaning and sexually suggestive remarks; physically attacking the sexual parts of her body; forcing her to watch pornographic video shows or see pornographic materials; catching the husband having sex with another woman in the marital bedroom; forcing the wife and mistress to sleep with the husband in the same room.

Trafficking in Women - the act of recruiting and transporting a woman within and across national borders for work or services by means of violence or threat of violence, abuse of authority or dominant position, debt-bondage, deception or other forms of coercion.

Acts of Lasciviousness - acts that are lascivious in nature, which include but are not limited to intentional touching, either direct or through clothing, of the genitalia, anus, groin, breast, inner thigh or buttocks; or the introduction of any object into the genitalia, anus or mouth of any child whether of the same or opposite sex with an intent to abuse, humiliate, harass, degrade, or arouse or gratify the sexual desire of any person; bestiality; masturbation; lascivious exhibition of the genital or pubic area of a person, etc.

Child Labor - the illegal employment of children below 15 years old, or those below 18 years old in hazardous occupation.

Child Prostitution - a practice where children, whether male or female, who for money, profit, or any other consideration, or due to the coercion or influence of any adult, syndicate or group, indulge in sexual intercourse or lascivious conduct.

Child Sexual Abuse - the employment, use, persuasion, inducement, enticement, or coercion of a child to engage in or assist another person to engage in sexual intercourse or lascivious conduct, or the molestation, prostitution, or incest with children.

Child Trafficking - the act of trading or dealing with children, including but not limited to, the buying and selling of children for money, or for any other consideration, or barter.

Children in Situation of Armed Conflict (CSAC) - children who are: a) members of displaced families as a result of armed conflict; b) physically weakened, orphaned or disabled as a result of armed conflict; c) combatants and those mobilized for other armed conflict-related activities; and d) disrupted from schooling due to armed conflict.

Day Care Service – an arrangement whereby substitute mothering is provided to disadvantaged pre-school children as well as street children during part of the day when the mother cannot attend to their children.

Disability - refers to any restriction or lack of ability to perform an activity in the manner or within the range considered normal for human being. A person considered physically or mentally disabled if he has any of the following impairments:

Blindness - if one eye or both eyes are reported totally blind and have no vision.

Deafness - if one ear or both ears are reported to be incapable of hearing sounds or noises.

Radio Stations - one or more transmitters or receivers or a combination of transmitters and receivers including the accessory equipment, necessary at one location for carrying on a radio communication service. Each station shall be classified by the service in which it operates permanently or temporarily. (**National Economic and Development Authority**)

Telephone Density – the ratio of the number of telephones to total population at a given date. It is expressed as the number of telephone main stations per 100 persons. (**Department of Transportation and Communications**)

Telegraph Station – a telecommunication station which is concerned with the transmission/reception of messages by means of the Morse Code. (**National Economic and Development Authority**)

Vessel – includes any ship or boat or any description of a vessel or boat, or any artificial contrivance used or capable of being used as a means of transportation on water. (**National Economic and Development Authority**)

VITAL, HEALTH AND NUTRITION

Bed Capacity – the number of beds permanently retained at the hospital for the treatment of in-patients. (**National Economic and Development Authority**)

Birth – the act or process of delivering a child. It may either be a live birth or a stillbirth. **(National Economic and Development Authority)**

Birth, Live – refers to the complete expulsion or extraction of a product of conception from its mother, irrespective of the duration of pregnancy, which after such separation, breathes or shows any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles, whether or not the umbilical cord has been cut off or the placenta is still attached; each product of such births is considered alive. **(Philippine Statistics Authority)**

Birth Rate, Crude – the ratio of the total number of live births in a given population during a year to the mid-year population during a given period expressed per 1,000 population. Sometimes it is referred to as simply as the birth rate and also live birth rate. **(Philippine Statistics Authority)**

Death – refers to the permanent disappearance of all signs of life of a living person at any time. **(Philippine Statistics Authority)**

Death Rate, Crude – the ratio of the number of deaths occurring within one year to the mid-year population expressed per 1,000 population. It is “crude” in the sense that all ages are represented in the rate and does not take into account the variations in risks of dying at particular ages. **(Philippine Statistics Authority)**

Fetal Death Rate (FDR)**** – the ratio of the number of fetal deaths in a population occurring within a given period to the total number of live births and fetal deaths occurring within the same period, expressed per 1,000.

Fetal Death (deadborn fetus) - death prior to the complete expulsion or extraction from its mother of a product of conception, irrespective of the duration of pregnancy. (WHO)

Hospital Bed-Population Ratio**** – the ratio of hospital beds to the population, usually expressed as the number of available hospital beds for every 1,000 population.

Immunization – process of introducing vaccine into the body to stimulate the formation of antibodies which fight disease-causing germs. Regular immunization programs of the government include: BCG – Bacillus Calmett Guérin to prevent Tuberculosis; DPT – Diphtheria, Pertussis and Tetanus; OPV – Oral Polio Vaccine. **(National Economic and Development Authority)**

Infant Mortality Rate (IMR)**** – the probability of dying between birth and age one, expressed as the number of infant deaths or deaths occurring before reaching 12 months of life in a given period per 1,000 live births.

Marriage – a special contract of permanent union between a man and a woman entered into in accordance with law for the establishment of conjugal and family life. It is the foundation of the family and an inviolable social institution whose nature, consequences and incidents are governed by law and not subject to stipulation, except that marriage settlements may fix the property relations during the marriage within the limits provided by the Family Code of the Philippines.

Maternal Mortality Rate (MMR)**** – the ratio between the number of women who died (for reasons of pregnancy, childbirth and puerperium) to the number of reported livebirths in a given year, expressed as the number of maternal deaths per 100,000 live births

Morbidity**** – the frequency of disease and illness, injuries, and disabilities in a population.

Mortality – the intensity of death in a population. It is sometimes used to mean the frequency of deaths in a population. **(National Economic and Development Authority)**

Mortality, Infant, Ten Leading Causes – Given the total number of infant deaths for every cause of death in the given year, the first ten causes with the most number of infant deaths are the ten leading causes of infant deaths for that year. **(National Economic and Development Authority)**

Mortality, Maternal – refers to deaths of mothers owing to deliveries and complications arising from

pregnancy, childbirth and puerperium. (Philippine Statistics Authority)

Mortality, Maternal, Ten Leading Causes – Given the total number of deaths among pregnant women for every cause of death in the given year, the first ten causes with the most number of deaths among pregnant women are the ten leading causes of maternal deaths for that year. (National Economic and Development Authority)

Mortality, Ten Leading Causes - Given the total number of deaths for every cause of death in the given year, the first ten causes with the most number of deaths are the ten leading causes of deaths for that year. (National Economic and Development Authority)

Mortality Rate – generally expresses the chance that death will occur during a particular period to a person in particular population group alive at the beginning of the period. As such, those rates are true probabilities and describe precisely the risk of dying for any actual cohort. (National Economic and Development Authority)

Mortality Rate, Child – the number of deaths among children aged 1-4 years old per 1,000 children in the same age group. (Philippine Statistics Authority)

The Regional Social and Economic Trends (RSET) presents time series statistical information about the region's economic and social environment. Various data are disaggregated in different dimensions useful in the conduct of strategic planning, policy, program and project formulation, business/investment decision-making, research, and feasibility studies. The information is intended to meet the needs of a wide range of data users such as government agencies/units non-government organizations, business firms, entrepreneurs, students, international institutions, and the general public. The RSET includes a glossary of terms that provides the definition of selected statistical terminologies not widely understood by the general public.

The 2020 edition of the RSET contains time series and cross sectional data on 17 sectors/subject areas of general interest such as:

population and housing
income and prices
economic accounts
environment and natural resources
agriculture and agrarian reform
establishment characteristics: industry
trade
tourism
vital, health and nutrition

education
labor and employment
social services
transportation and communication
public administration
money and banking
public order, safety and justice
