

## Palay and Corn Production Annual Performance in the Province of Ifugao for CY 2023-2024

**Date of Release:** 22 April 2025  
**Reference No.** SR-2025-008

### A. PALAY PRODUCTION

For the year 2024, Ifugao Province produced a total of 28,337.25 metric tons of palay. Compared to the year 2023, production decreased by 34,201.71 metric tons or -17.15 percent less. The decrease was attributed to the decrease in yield per hectare of the palay areas. (Table 1)

The total palay area harvested for the year 2024 in the province was recorded at 11,112.21 hectares, which was lower in 2023 recorded 12,107.87 hectares. The area harvested for Irrigated palay recorded 10,489.41 hectares represented 94.40% of the total palay area harvested while Rainfed Palay recorded 622.80 hectares represented 5.60% of the total palay area harvested in the province. No Upland Palay harvested for the year 2023 and 2024. (Figure 2)

## B. CORN PRODUCTION

As for corn production, Ifugao Province produced a total of 54,469.96 metric tons of corn for the year 2024. Production increased by 2,685.95 metric tons or 5.19 percent more compared to the year 2023. The increase was attributed to the insufficient rainfall and presence of insect pests on the corn areas. (Table 1)

## **TECHNICAL NOTES**

The Palay Production Survey and Corn Production Survey are conducted quarterly by the Philippine Statistics Authority to generate estimates and forecasts on palay, area, and yield to provide data inputs for policy programs on rice and corn.

This survey was conducted in the province of Ifugao which covers sample farming households in its various municipalities with reference period, as follows:

April Round Survey – January to March  
July Round Survey – April to June  
October Survey Round – July to September  
January Round Survey – October to December
