The results of the 2015 Census of Population (POPCEN 2015) showed that the total population of the Province of Ifugao reached 202,802 with 48.3 percent women and 51.7 percent men. This translated to a sex ratio of 100 women for every 107 men.

In Table I, Ifugao female outnumbered male in older ages 70-79 and 80 years and over. The number of youths in Ifugao aged 15 – 24 years in 2015 reached a total of 42,024 comprising 20.75 percent of the province's total population of which 48.57 percent were women and 51.43 percent were men.

Figure 4. Dependency Ratio by Sex, Ifugao, 2015

(per 100 persons aged 15-64 years)

Source: Philippines Statistics Authority

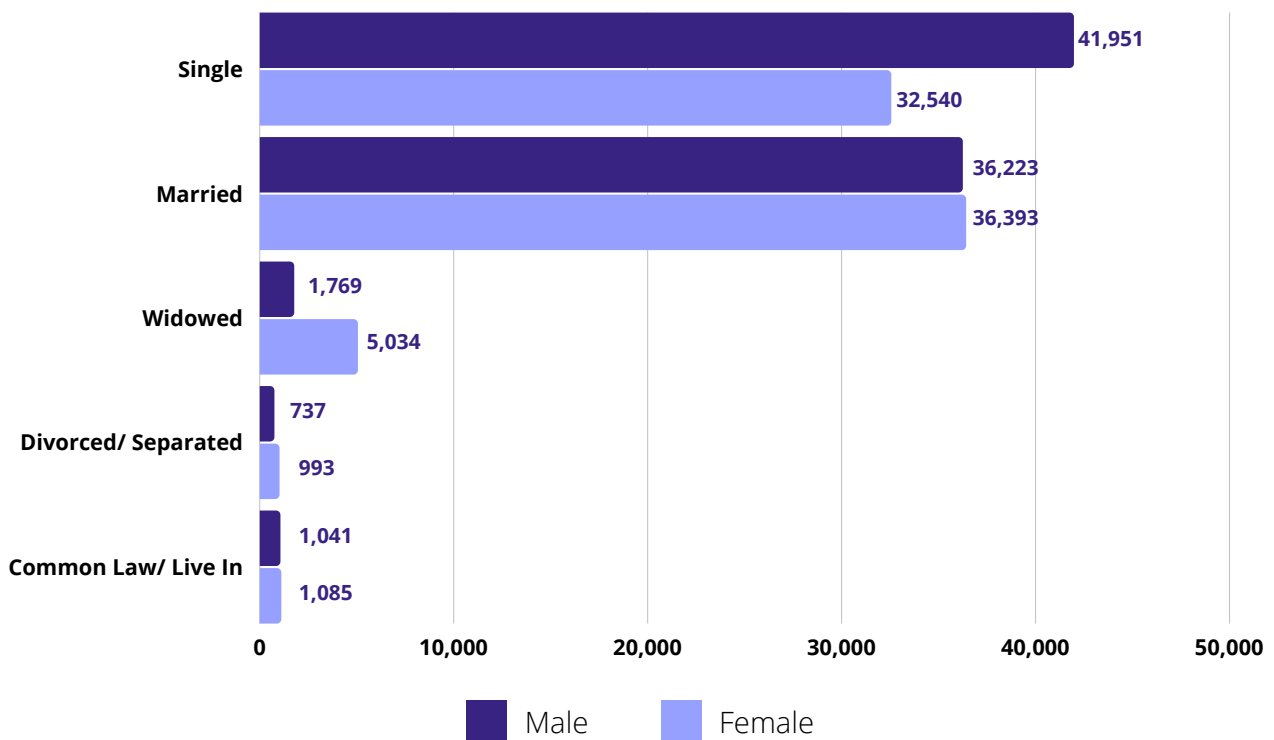

As of August 1, 2015, the household population in Ifugao totaled 202,519 persons, of which 33% comprised the young age group. The old age group comprised only 5% of the province's household population, while those in the working-age group comprised 60%.

The overall dependency ratio of the province was 61 persons in 2015. That means that in every 100 persons in the working-age group, 61 persons belong to the young and old age groups. In theory, roughly half of the population is a working-age, supporting the other half of the population, and are either children or retired.

The female dependency ratio of the province was 63 persons. Out of this ratio, 54 were young dependents and 9 were old dependents. The male dependency ratio is 59 with 52 persons for young dependents and 7 persons for old dependents.
