

SPECIAL RELEASE

Corn Situation of Apayao Province Cordillera Administrative Region July-September: 2019-2021

Date of Release: 28 January 2022
Reference No. 2022-CARAP-SR01

Production

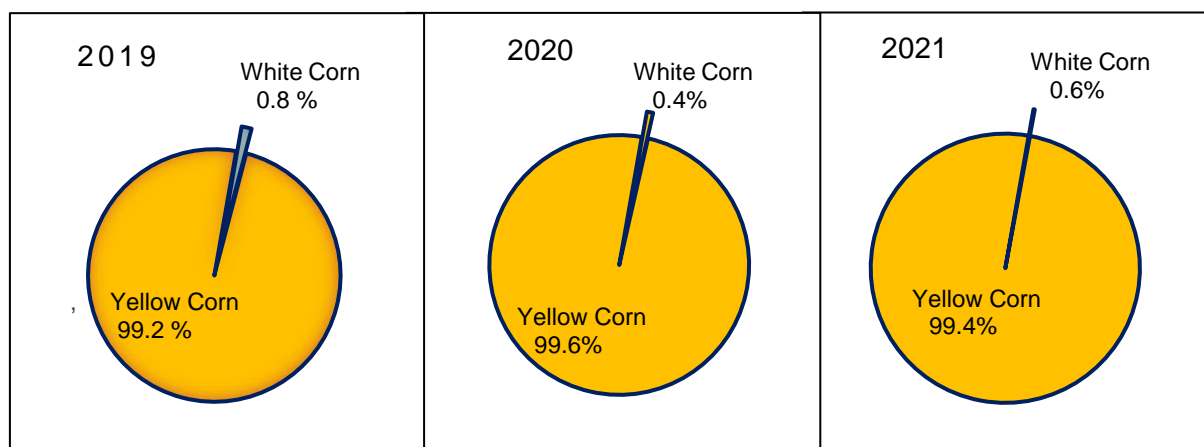

Corn production from July to September 2021 was posted at 5,511.76 metric tons. It dropped by 31.6 percent from its 2020 same quarter output of 8,064.00 metric tons. In 2020, production recorded the highest during the quarter from 2019 to 2021. (Figure 1 and Tables 1)

CONCEPTS AND DEFINITIONS

Crop Production- refers to the quantity produced and actually harvested during the reference period. It includes those harvested but damaged, stolen, given away consumed, given as harvester's and thresher's shares, reserved, etc. However, it excludes those produced but not harvested due to low price, lack of demand and force majeure or fortuitous events, etc.

Harvest Area - refers to the actual area from which harvests were realized. This excludes crop area that was totally damaged. It may be smaller than the area planted.

Types of Corn

- Yellow Corn - type of corn used generally as feed grains. It includes all types of corn other than white.
- White Corn- type of corn used primarily for human consumption.

Metric ton - refers to a unit that is being used which is equal to 1,000 kilograms.
