

SPECIAL RELEASE

Corn Situation of Apayao Province Cordillera Administrative Region October-December: 2019-2021

Date of Release: 31 March 2022
Reference No. 2022-CARAP-SR04

Production

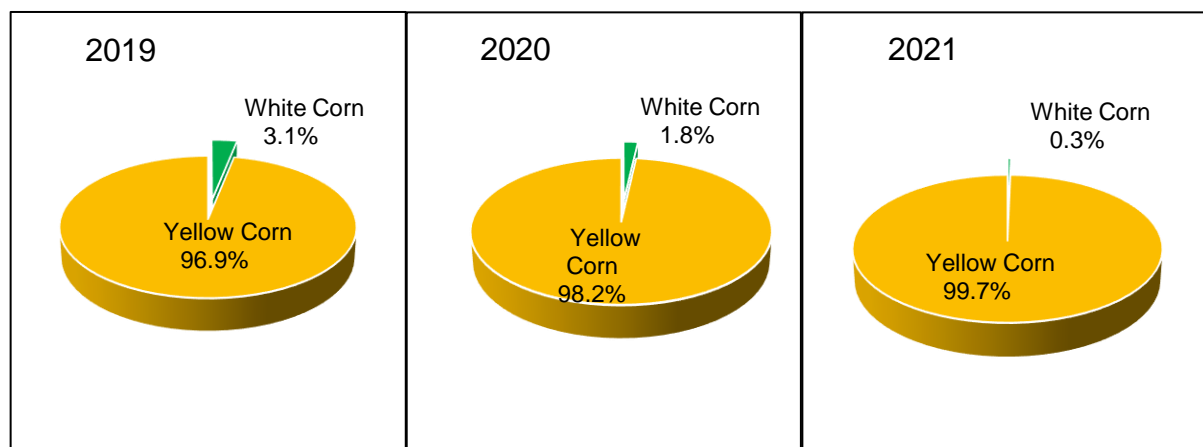

In October to December 2021, production of corn at 7,240.36 metric tons went down by 194.14 metric tons or 2.6 percent from previous year's same period level of 7,434.50 metric tons (Figure 1 and Tables 1)

Figure 2. Percent Share of Yellow and White Corn to Total Production, Apayao Province, Cordillera Administrative Region, October-December: 2019-2021

Source: Philippine Statistics Authority, Corn Production Survey (CPS)

During the fourth quarter of 2021, yellow corn output comprised 99.7 percent to the total corn production. (Figure 2 and Table 2)

Harvest Area

Harvest area for October to December 2021 contracted by 393 hectares or 19.2 percent, from the previous year's same quarter of 2,045 hectares to 1,652 hectares. By corn type, yellow corn decreased by 355 hectares from the 2020 level of 1,995 hectares. Likewise, white corn dropped by 38 hectares from 50 hectares to 12 hectares. (Figure 3 and Table 1)

CONCEPTS AND DEFINITIONS

Crop Production- refers to the quantity produced and actually harvested during the reference period. It includes those harvested but damaged, stolen, given away consumed, given as harvester's and thresher's shares, reserved, etc. However, it excludes those produced but not harvested due to low price, lack of demand and force majeure or fortuitous events, etc.

Harvest Area - refers to the actual area from which harvests were realized. This excludes crop area that was totally damaged. It may be smaller than the area planted.

Types of Corn

- Yellow Corn - type of corn used generally as feed grains. It includes all types of corn other than white.
- White Corn- type of corn used primarily for human consumption.

Metric ton - refers to a unit that is being used which is equal to 1,000 kilograms.
