AQUACULTURE

It is a fishery operation involving all forms of raising and culturing of fish and other fishery species in fresh, brackish, and marine water areas. The operation is comprised of activities from stocking to the harvesting of species under controlled conditions in farming facility called aquafarm.

INLAND MUNICIPAL FISHING

It is the catching of fish, crustacean, mollusks and other aquatic animal and plants in inland waters like lakes, rivers, dams etc. using simple gears and fishing boats some of which are non-motorized with a capacity of less than three (3) gross tons, or fishing not requiring the use of fishing boats.
