## TECHNICAL NOTES

### Census of Agriculture and Fisheries (CAF)

The CAF is a large-scale government undertaking that is geared towards the collection and compilation of basic information on the agriculture and fishery sectors in the country. Data collected will serve as the bases for policymaking and other purposes.

### Agricultural Operator

An agricultural operator is a civil or juridical person who/that exercises management control over the agricultural operation of a farm and takes major decisions regarding resource use. He/she has technical and economic responsibility for the farm and may undertake all responsibilities directly, that is, he/she operates the farm or delegates responsibilities related to day-to-day work management to a hired manager.

### Crop Farm Operator

A crop farm operator is solely responsible for making the technical and economic decisions and implementation of the plans involving the types of crops to be planted in relation to the type of soil in the agricultural farm, amount of water to be used in irrigating the farm, fertilizer to apply, time of planting and other farm implements, and other consequences that may result from the farm operation.

### Livestock/Poultry and/or Insect/Worm Farm Operator

A livestock/poultry and/or insect/worm farm operator is solely responsible for taking the technical and economic decisions and implementation of the plans involving the kind of livestock/poultry to raise and/or insects/worms to be cultured, type of feeds and vaccines, time of pasture in an open field and time of putting them back in a shelter, number of animals for slaughter/dressing/selling, and other consequences that may result from the farm operation.

### Notes:

The results are based on the conduct of the 2022 CAF among households and non-household entities that operated agricultural activities from 01 January to 31 December 2022.
