Php **1.00** =      Php **0.76**

Php **100** =      Php **76**

**0.78**  
February 2024

**0.76**  
February 2025

### Technical Terms

<b>Consumer Price Index (CPI)</b> The CPI is an indicator of the changes in the average retail prices of a fixed basket of goods and services commonly purchased by households relative to a base year	<b>Uses of CPI</b> The CPI is most widely used in the calculation of the inflation rate and purchasing power of peso. It is a major statistical series used for economic analysis and as a monitoring indicator of government economic policy	<b>Purchasing Power of Peso</b> It shows how much the peso in the base period is worth in the current period. It is computed as the reciprocal of the CPI for the period under review multiplied by 100.	<b>Inflation Rate</b> It is the annual rate of change or the year-on-year change of the CPI. Inflation is interpreted in terms of declining purchasing power of money.	<b>Market Basket</b> It is the total number of goods and services in constant amounts and qualities which are samples of the goods and services available in the market and included in the construction of the index.
